

**U.S. Bomber or 'Paper Plane'?** 

By Richard Halloran

New York Times Service WASHINGTON — The secretary of the Air Force, Verne Orr, has asserted that the An rorce, vane on, as asserted hat the Stealth plane, which Socretary of Defense Caspar W, Weinberger is scriously consider-ing as the next U.S. long-range bomber, is "a paper airplane" that is far from develop-

Mr. Or has also expressed skepticism over a proposal that the new MX nuclear missile be carried aboard planes instead of being based on land.

While Mr. Orr declined to disclose his specific recommendations to Mr. Weinberger on the bomber, he made clear his thinking on the two most important decisions coofront-ing Mr. Weinberger, which are selecting the new bomber and choosing a base for the MX mesule -

Concerning the bomber issue, Mr. Orr said that the Stealth aircraft, which would be intended to evade detection by radar and other sensors, would not be off the drawing board for two years. His assessment differed sharply from the "major technological break-through" depicted a year ago by Harold Brown, then the secretary of defense. Mr. Brown contended at the time that the Stealth plane would alter the military balance plane would alter the military balance. Mr. Brown asserted: "We have demon-

strated to our satisfaction that the technology works." He was sharply criticized by Re-publicans for disclosing progress on the DIOICCL

Mr. Orr. a longtime political associate of President Reagan, expressed a far less opti-mistic view. "We have a paper airplane," be said. "I think we've seen a lot of wishful thinking that we can have the new just the day after tomorrow. This 'new' is very new."

Mr. Weinberger suggested Wednesday that publicizing the decision on the missile-basing would be put off until Labor Day. Other officials indicated that the same would be true for the bomber decision because the two seem to have merged into one issue.

Congress is considering Mr. Reagan's budget and tax measures, and officials said that the administration wanted to avoid distracting Congress with other provocative is-sues. Congress plans to go into recess at the end of this month.

#### Dispute on Timetable

Mr. Orr said that pressing ahead with the Stealth aircraft could be accomplished only at "tremendous cost," adding: "I don't think there's any mood to pull all the stops." He also expressed doubt that U.S. industry had the capacity for a rush program.

Where Mr. Brown had asserted that the Stealth plane might be operational as early as 1987. Mr. Orr said it might take 10 or 12 years to develop it fully. He said the only people arguing otherwise were "two manu-facturers who've got something to sell." He did not identify them. He said that optimism about earlier development "is not the view of

the Air Force or anyone that I know that has

any authority or responsibility." Moreover, be said he feared that evidence of the new plane would register on improved Soviet radar. The Stealth bomber "may be invisible today, so to speak," he said, "but if it's 10 years from operation and the Soviets don't stand still, there may be signatures that

conceivably would be found." Since the technical and economic aspects of the Stealth aircraft have been kept highly secret, independent observers have little evi-dence to determine which parts of the argument have been based on fact and which on political considerations

Mr. Orr said that four weeks ago the Air Force completed a long presentation to Mr. Weinberger on three options for replacing the B-52 long-range bomber. They were these:

. To build a variant of the B-I bomber while developing the Stealth aircraft, which could evade radar detection.

 To improve the smaller FB-III bomber while developing the Stealth plane.

• To skip both the B-1 and the FB-111 and drive hard in build the Stealth bomber. The B-I bomber was canceled by President

Carter in 1977. Mr. On was critical of the proposal to have MX intercontinental ballistic missiles aboard a new fleet of large, slow aircraft that could loiter over the Atlanuc or Pacific for bours without refueling, or longer with

# **Begin Rejects U.S. Assertion That Israel Has Derailed Peace**

By William Claiborne

Washington Post Service JERUSALEM - Prime Minister Menachem Begin on Thursday re-jected U.S. Defense Secretary Caspar W. Weinberger's assertion that Istaeli military operations in Lebanon and Iraq had derailed the

Mideast peace efforts of U.S. spe-cial envoy Philip C. Habib. Mr. Begin, in a statement issued by his office, referred to Mr. Weinberger's assertion Wednesday that on two occasions Mr. Habib was on the verge of reaching an agree-ment to defuse the crisis over the deployment of Syrian missiles in Lehanon but that each time the effort was souttled, first by the Israeli air strike on Iraq's nuclear

reactor and then by the bombing of central Beirut. "The prime minister met fre-quently with Mr. Habib for many hours of conversation after these events, but never did he learn such news from him." the statement said. "Mr. Caspar Weinberger alleges

that the prime minister does not behave with moderation. This reaction to Mr. Weinberger's astonishing remark is illustrative of the prime minister's manifest moderauon." it added.

[A Pentagon spokesman said Thursday that Mr. Weinberger was referring in Israeli policy, not to Mr. Begin personally, in referring to a lack of moderation. The Associated Press reported. [However, while apparently at-

funding to defuse any personal feuding between Mr. Weinberger and Mr. Begin. Pentagon spotes-man Henry Catin said that the defense secretary is "not hacktrack-

ing" on his statements, which also deplored violence, aggression and retaliation in the Middle East.] At a White House news briefing Wednesday, Larry Speakes, depu-

ty press secretary, made it clear that Mr. Weinberger was speaking for the administration. The secretary. Mr. Speakes said, "very aptly described our position with regard to both parties" in the Middle East

and the need for a de-escalation of the violence and a cease-fire. Another administration official, William P. Clark, deputy secretary of state, said Wednesday that the U.S. attitude toward Mr. Begin these days was one of "disappointment and maybe some embarrass-

tiating all the various problems and getting to personally know these other individuals, getting into a really first-name basis," he At the Monday night barbecue dinner, Mr. Reagan's personal aide, Michael K. Deaver, recalled that Chancellor Helmut Schmidt

of West Germany had become "rather beavy," and Mrs. Thatcher softened the mood by leaning over to Mr. Reagan and joking: "Oh, that's all right. Helmut's just being provocative." "Everybody laughed, including Helmut," Mr. Deaver said.

There were other times when the president felt moved to comment to his aides, Mr. Deaver and the major economic powers had agreed to pursue their talks about presidential counselor, Edwin Meese 3d, about the "great calm-

ing influence, the constructive influence," of Mrs. Thateher. During the final sessions on Tuesday, when the leaders were at odds over communique language in several places, Mrs. Thatcher

He singled out Prime Minister **EEC Interest-Rate Plans** BRUSSELS (Reulers) - Mem-

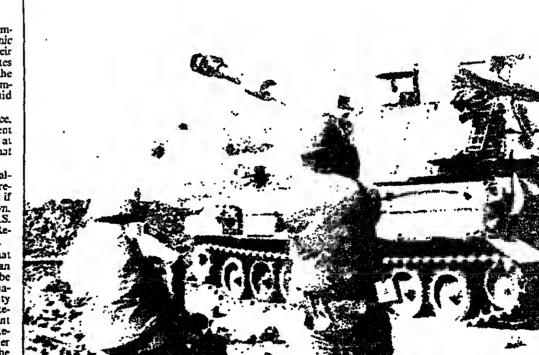

bers of the European Economic Community will have to seek their own remedies if U.S. interest rates do not come down by autumn, the president of the European Com-mission, Gaston Thorn, said Thursday.

Speaking at a news conference, Mr. Thorn said that President Reagan expressed his conviction at the Ottawa summit meeting that rates would fall.

He said, however, that U.S. allies had asked Mr. Reagan to review the situation in the autumn if interest rates did not come down, and that the request caused U.S. Treasury Secretary Donald T. Regan to say be would visit Europe.

Mr. Thorn said he wished that Britain would join the European Monetary System, a move that be said would help create an international zone of monetary stability and ease the effects of U.S. strategy. He said be regretted the recent decision by the U.S. Federal Reserve Board to aim for still slower growth in the money supply. The Fed is too monetarist and follows

too elosely short-term money supply variations, be said.

Israeli tanks and artillery fired across the border with Lebanon Thursday to hit guerrilla camps.

# India Stocks Up on U.S. Wheat

By Stuart Auerbach Washington Post Service NEW DELHI — After four years of self-sufficiency in food grains, India has been forced into

the international market to huy 1.5 million tons of wheat from the United States in fill its dwindling reserve stocks.

Prime Minister Indira Gandhi said that ber government is buying the wheat as an anti-inflationary measure to fight the market maching

nations of traders and hoarders. "I believe in stocking up." when things are inexpensive and readily available, she explained. "We don't find it necessary," she said

later, "hut we find it expedient." The purchases aroused protests in newspaper editorials and from politicians, especially since India has often boasted of its newly won ability to feed its 684 million people with home-grown grain. Moreover, Iodia was able to get through the 1979 drought, one of the worst in the century, without a famine or

having to purchase grain from abroad. The Indian Express called the wheat purchase "more shocking results of the government's economie mismanagement."

"India's self-sufficiency in food grains has been its most shining achievement in the eyes of the world. The incongruity of our re-sorting in imports cannot escape international attention," the news-

paper said. Even politicians of Mrs. Gandhi's Congress-I Party complained that the money should bave been spent on the Indian farmers instead of in the United States.

Opposition leader A.B. Vajpavthe former foreign minister, ĊĈ. called the decision to buy U.S. wheat "a national disgrace" and "a \$200 a ton. betrayal of the Indian farmer."

But Westerners who have tra-"The spineless Congress-1 govin the United States," be added in demanding a national boycott of the U.S. wheat. veled recently through India's wheat-growing regions report no signs of boarding and say the high market price indicates real sbort-

Nonetheless, it is clear here that the Gandhi government got a good deal for the U.S. wheat. The purstocks came after a disastrous monsoon in 1979 that forced India cbases, at about an average price of \$172 a ton, were made at a time when wheat prices in the United to dip into its reserve stock. States are depressed and before exhad more than 20 million tons of food grains, mostly wheat and rice, in reserve. That has been diminchases,

The total purchase price has ished, and in May there were only been reported here at about \$260 3 million tons of wheat on hand in million government warebouses.

The purchase comes amid esti-mates of a record Indian wheat crop of about 36 million tons. Outside observers, however, believe these reports are unduly optimisue. U.S. satellite photos, for instance, indicate a crop of about

#### House Panel Votes Military Building Funds . The Associated Pres

WASHINGTON - The House Appropriations Committee approved a record-high \$6.9-billion military construction spending bill Thursday, but withheld all money intended for the MX mobile missile project because of uncertainty over how the nuclear weapon will be based.

Rep. Ralph Regula of Ohio, the ranking Republican on the Subcommittee for Military Construction, noted that the bill gives new emphasis to construction for U.S. troops stationed in Europe, who he said have had to endure "horrible living and working conditions" for years. About

\$1 billion is earmarked for such construction. Another large amount, \$334.7 million, is set aside for construction in Somalia, Kenya, Oman and the Indian Ocean island of Diego Garcia for the interservice Rapid Deployment Force, which would respond to a crisis in the Gulf region.

# Agca Will Not Appeal Life Prison Sentence

ROME - Mehmet Ali Agea, the Turk sentenced to life imprisonment for the attempted murder of Pope John Paul II, will not appeal the sentence, his lawyer said Thursday.

"I spoke with Agea for 30 minutes this morning, and he told me he does not intend to lodge an appeal," said Pietro d'Ovidio, his attorney. Mr. Agca, 23, was sentenced to life in prison Wednesday at the end of a three-day trial during which he admitted shooting the pope. A defense request to reduce the sentence to 30 years on the grounds that Mr. Agea could not be held accountable for his actions was rejected by the presid-

ing judge.

ROME — Pope John Paul II, recovering in a Rome hospital after an assassination attempt in May, is unlikely to be discharged until doctors have carried out e second operation on his intestine, the hospital's medi-

cal chief said Thursday. A medical bulletin, the 25th since the shooting May 13, said that the pope had nearly recovered from a viral illness that brought him back to, the Gemelli hospital on June 20. He was originally discharged on June 3. Doctors have said the pope must wait at least three weeks after the disappearance of the virus before he is strong month for an operation to reconnect an injured section of intestine bypassed in surgery immediately after the shooting.

#### Kidnapped Auto Executive Is Freed in Milan The Associated Pres

MILAN - The Red Brigades on Thursday released Renzo Sandrucci, the Alfa Romeo anto company executive whom they kidnapped 50 days earlier.

Mr. Sandrucci, 53, was found in good physical condition a car near a factory in Milan, according to initial police reports. An anonymous telephone caller told a local radio station where he could be found. The Red Brigades urban guerrillas had said that they planned to free both Mr. Sandrucci and Ciro Cirillo, 60, a prominent Christian Demo-crat from the Naples area, as an act of "revolutionary magnanimity."

#### 220 Leaders in U.K. Assail U.S. Foreign Policy The Associated Presi

LONDON - British politicans and union leaders published a fullpage open letter in Friday's Times of London criticizing President Reagan for his foreign policy, which they claimed is hurting Third World

countries. The letter carries 220 signatures, including 48 members of the House of Commons, five members of the House of Lords, five British represent-atives to the European Parliament and a mumber of British trade union

The letter attacked the U.S. foreign policy where it is concerned with the containment of Communism. Those who signed the letter expressed support for the opposition struggles in South-West Africa, South Africa, western Sahara and by Pales

## Kieran Doherty and Kevin Lynch,

The speculation followed the last-minute cancellation of an address on the bunger strikes to the Irish parliament by Premier Garret FitzGerald, Published reports said that Mr. FitzGerald may have been concerned the timing of his speech would upset the chances of a settlement.

According to the reports, one possible attempt to end the crisis would involve a question-and-an-swer session among the fasting prisoners, their families and Northern Ireland officials. Such a meeting would sidestep the issue of negotiating directly with the pris-oners, which the British government refuses to do.

The Red Cross delegation that arrived in Belfast last Thursday met for two hours with Michael Alison, deputy secretary of state in charge of Northern Ireland's prisons, before leaving.

"We came bere to see whether we could play a useful role," said a mediator, Frank Schmidt, explaining that after several meetings with the bunger strikers "we came to the conclusion that this was not the case. The two sides wouldn't meet and we found we had no role to play."

Mr. Doherty, 25, has gone 63 days without food. Mr. Lynch, also 25, has not eaten in 62 days. Both were conscious and lucid,

100% Fireproof new Holal with

WASHINGTON (WP) - The Army has defended its new M-1 main battle tanks but estimated that they will run up \$27 billion in "support costs" over their predict-ed 20-year lives, increasing the ex-pected price tag to \$47 billion.

The estimate threw into sharp GAO officials, testifying Tuesrelief an often obscure aspect of the full costs of the 47 major weapons systems now being acquired, said Sen. William Proximire, a Wisconsin Democrat. Congress should require the Pentagon to provide support-cost estimates for all the Maryland.

Sen. Proximire elicited the \$27billion figure at a hearing of his Joint Economic subcommittee after the Army acknowledged some problems with the M-1, rejected searing criticisms of it by the General Accounting Office and went on to acclaim it as "the best tank in the world today" and "an absolute winner."

Support costs - normally left ioned by the armed ser-

vices when they seek congressional approval of new weapons systems represent the money needed to operate a system after it and initial

A broadcast from Tehran an-nounced that in a continuing zackdown on leftists, 24 persons were executed in Evin Prison late Wednesday and early Thursday. Meanwhile, a parliamentary dopu-ie' y was reported to have escaped an issassination attempt Wednesday, rear the southern city of Equil, and ntial candidate Habibollah Askaroladi Mossalman was wounded on Monday by gunmen n Tehran.

# **Magazine Says**

The Associated Press LONDON - Pakistan will have

its first nuclear explosive device this summer, and President Mohammed Zia ul-Haq is negotiating with Peking for a site to test it, according to the New Scientist magazine.

Although Pakistan has consist-ently denied that it plans to acquire nuclear weapons, "specula-tion is increasing that it will test a primitive nuclear bomb this summer," an unsigned article in the British weekly said.

The article said that intelligence experts in the United States believe that Pakistan has secretly built a plutonium-reprocessing plaat near Rawalpindi that could provide enough nuclear fission for a test explosion without waiting for the completion of a uranium enrichment plant at Kahnta about 40 miles south.

Observers believe that the secret plant, said to be near completion, was designed to make between 10 and 20 kilograms of plutonium a year — enough for three bombs.

#### India Has a Success

With Satellite Relay United Press Internatio NEW DELHI - India has suc cessfully operated its own communication satellite, despite the fail-

ure of a solar panel to open. Apple, India's first experimental communication satellite, relayed a dance show Wednesday from one part of the country to another. The \$5-million, 1,355-pound satellite was launched June 19 aboard the European Ariane rocket.

# **Better Deaf Than Dumb Allies**

The best thing about the economic summit conference is that it still exists. Only a few months ago the Freoch suggested that the seventh annual meeting in Ottawa be the last. But that meeting's only real decision was to start a new round of summit sessions in France next summer and to improve the year-round, lower-level consultations They have never heen more needed.

Not in a generation have the industrial democracies been so hadly divided, on political and military as well as economic issues. Yet their consultations fell off after changes of leadership in Washington and three other capitals. Surely the Reagan team now appreciates the need for hetter contacts, particularly about U.S. economic policies, which heavily affect the allies.

But nothing else seems to have been ac-complished in Ottawa. The Americans climbed the summit primed more for public relations than for negotiation. They did extraordinarily well in getting their views to the news media. But the impression the allies took away was of ideological rigidity clothed in presidential charm.

As Treasury Secretary Regan revealed, it was a dialogue of the deaf. Recalling Mr. Reagan's refusal to hudge on high U.S. interest rates - which keep the Europeans on recession's rack - the secretary said the other leaders "recognized his strength and determination, and there was dead silence."

But the silence has not lasted long. Responding to U.S. assertions that the Reagan policies will reduce inflation and hring interest rates down, the president of the European Commission, Gaston Thorn, said: "Hurry up. We can't wait too long." Chancellor Schmidt said he would immediately have to tighten West Germany's austerity helt and cut government spending - without saying whether be would cut the military programs the United States wants increased.

President Mitterrand said it would be "intolerable" if high interest rates and depressed currencies continued beyond the end of the year. With 24 million unemployed in the industrial countries. including 20 percent of Europe's youth, he warned of an approaching "flash point" that could catalyze social upheaval. There was general criticism also of U.S. refusal to contemplate more economic aid for the Third World — even for developing new energy sources for everyone's bene-

The allies believe that more moderate tax cuts and some deflation in the United States would permit a measure of recovery in Europe and the Third World and thus contribute to a later U.S. upturn. Reagan's deep tax cuts, they fear, will not be adequately offset by tight money and high interest rates. And the persisting recession in both the industrial and developing countries, they warn, will only hinder U.S. foreign and military policies.

They contend that economic crisis and political instahility in the developing countries will only open new opportunities for Sovict adventure. Economic weakness in Europe, they insist, will injure Western defenses and add to the social discontent that hreeds neutralism.

When expressed in diplomatic cahles, these fears are easily dismissed by an administration focused on domestic concerns. But they cannot fail to make an impression in face-to-face talks. Ottawa gave no guarantee of better allied coordination. But without summits and the foothill consultations that surround them, the chances would be hleaker still

THE NEW YORK TIMES.

# **Gibraltar: The Lighter Side**

Let us acknowledge at the outset that there is a serious side to the British-Spanish contretemps over whether or not Prince Charles and Lady Diana's honeymoon cruise should be launched from Gibraltar. Spain and Britain are involved in negotiations over the future of the Rock, which overlap with talks about Spanish entry into NATO and the Common Market. There was no good reason to complicate any of those contacts. With a hit of the right diplomatic advice to the prince and his bride, the Foreign Office could have avoided the mildly absurd situation that has arisen.

King Juan Carlos, on the other hand. had little flexibility once the decision was made to have the royal yacht sail from Gibraltar. Since Spain's right to ownership of the British colony is one of the very few things that unite all Spaniards, the king was pretty much bound to honor public opinion and cancel his plans to attend the wedding.

We also want to point out, though, that the incident is likely to hlow over in time, and that one should not lose sight of its lighter the Peace of Utrecht in 1713. Minorca finally returned to Spain under the Peace of Amiens in 1802, hut Gib has remained fiercely British. Listen to the echoes of the War of the Spanish Succession and the Seven Years' War, of pageantry and royal weddings past.

The right tone on this kind of subject is often struck in the House of Commons. Take this exchange between Kevin McNamara, a Labor member from Kingston upon Hull, and Sir Ian Gilmour, the Lord Privy Seal. Mr. McNamara: "When the heir to the throne is in a position of contention between two countries of Western Europe, it would have been better advice for them to have boarded the royal yacht at Jersey, Sark or Alderney [Channel Islands]." Sir Ian: "I do not agree. If you are going to have a cruise in the Mediterranean, Jersey is not the best place from which to embark." The Lord Privy Scal might double as the royal geographer.

In the 18th century, there would have been two ways to settle the situation - a war, or a wedding to, smooth out the differences be-

By Joseph Kraft

make a decision regarding delivery of 10 F-16 fighter planes previously earmarked for Israel. Fmally, when the decision to suspend delivery of the planes was announced, Mr. Haig said: This is not a decision that is linked to any specific action on the part of the government of Israel

But why this superhuman effort not to pass judgment on Israel? The main reason is to make it seem that Mr. Reagan is making all the decisions without any push or tilt from his advisers.

Absolute compartmentalization results from such procedures, and Ottawa provided a striking example. In handling summit discussions on the Middle East oo the one hand, and the situation between Israel and Lebanon on the other hand, the United States looked almost schizophrenic.

#### Anodyne Statement

Mr. Haig and the other foreign ministers be-gan talking about the Middle East when they arrived in Ottawa oo Sunday. The Europeans sought a joint statement condemning the Israe-li attacks on Beirut. Mr. Haig prevailed on his colleagues to issue a totally bland statement. It said the seven countries were "distressed by the scale of the destruction," and it called on all "parties to exercise restraint." The French minister for external relations, Claude Cheysson, was so disgusted by the weakness of the declaration that he revealed publicly that France had sought a statement much tougher on the Israelis.

While the anodyne statement was evolving, Mr. Reagan and his advisers were also considering action to back up Mr. Habib's negotia-tions for a cease-fire between Israel and Leba-

# Winners, Losers, And Votes

By George F. Will WASHINGTON - Alop his ought to be, Richard Scannan his a large body, right where it ought to be, Richard Scannan his a large head. His head is so cranned with election data and political wisdom that it is impossi-ble to talk with him without learn-ble to talk with him without learn-ten him without learn-ten him without learn-ten him without learn-ble to talk with him without learn-ble to talk with him without learn-ten him without learn-ten him without learn-him without lear

ble to talk with him without learn-ing interesting things. Recently I learned the following: In the last decade, 38 congres-sional districts were "hig gainers." Their populations increased at least 35 percent. Most (22) are held by Republicans. The 16 held by Democrats are all in the South and West. (All 38 are held by while males.) males.

losers. Their populations declined at least 10 percent. All 35 are held by Democrats. All except two (ode in Memphis and another to Louis-ville) are metropolitan districts in the East and Midwest. Eleven of the 16 black members of Congress

ine 16 https://www.commons.com/ are from these districts. In the May 7 vote on President Reagan's budget cuts, representa-tives of the big winners voted 31 for, 7 against. Those from big losers voted 1 for, 33 against. In the June 26 vote on Mr. Reagan's budget package, hig gainers voted 31 for, 7 against; big losers voted 0 for, 34 against. On an anti-busing measure, big gainers voted 32 for. 3 against; big losers voted 32 for. 3 against; big losers voted 3 for. 25 against. On a measure to prohibit funds from being used to "pro-mote homosexuality" (it concerned legal services), big gainers voted 31 for, 5 against; big losers voted 7 for, 26 against. To Mr. Scammon, the signifi-cance of these oumbers is more

two lines of action. Everybody, in consequence, was dissatisfied. The joint statement disappointed the Arabs and their friends in Europe. Suspension of plane deliveries put Mr. Begin up against the wall. He replied, predictably, by saying that he would agree to a cease-lire if the United States would agree to a cease-lire if the United States could also negotiate an accord with Lebanon. That is practically impossible because the regime in Beirut cannot control the Palestinians. Indeed, the Palestinians are now tempted to attack the Israelis in order to provoke an exaggerated retaliation that would discredit Mr. Begin still further.

ic change

Mr. Begin still further. A far better outcome would have been possi-ble if the United States had joined the Euro-peans in a strong condemnation of the Israeli raids. That would have served as a warning to Mr. Begin. Fear that suspension of the plane delivery would follow might have induced him to take a more positive approach to a cease-fire. If it didn't, the United States could have

non. The decision to suspend plane deliveries was made in that context, and published a cou-ple of hours after the joint statement was is-

sued. There seemed to be no link between the two lines of action.

a server a construction and the server and the server and the

fire. If it didn't, the United States could have then suspended the plane delivery — leaving the next move to Mr. Regin. As it is, a genuine crisis seems to be build-ing. Mr. Begin is angry, and the Palestinians are on the warpath. The United States has thrown away a card it should have held in re-serve. For all his success in defending econom-ic policy, Mr. Reagan on the Middle East is perceived as no Talleyrand. Indeed, it is hard to see how the administration can manage se-curity affairs until Mr. Reagan decides to place faith in a single official who knows the full range of foreign policy issues.

full range of foreign policy issues. 01981, Las Angeles Times

Thirty-five districts were "hig

are from these districts.

cance of these oumbers is more than that the country is moving south, west and conservative. It is that when the districts that are big gainers and big losers are so com-pletely on opposite sides of the id-eological divide, there is little that gerrymandering can do to dilute the political impact of demograph-

**Melting Computers** 

All of the big winner districts are oow too big and must be pruned. All of the big losers are too small and must have bits of other districts grafted on to them, or must disappear, dispersed in bits to other districts. A computer is apt to melt from frustration if asked to accomplish such redis-tricting without helping the Re-multimeter publicans.

The pruned "excess" bits from big gainer districts are apt to raise the conservatism of contiguous districts to which the hits are added. And the additions to, or dismemberments of, big loser dis-tricts are apt to reduce the number

of liberal districts, This redistricting process poses problems for the Congressional Black Caucus. (Its interests are not, of course, necessarily the same as the interests of black people.) To be sure, some demographic changes enhance the chances of electing blacks to Congress. For example, in the last decade Detroit lost half its white population, and New York lost about one-third.

But the desire of blacks to be represented by blacks may be at

odds with the interests of black

who vote is low relative to whites.

So it may require a district at least 60 percent black (or black and

Hispanic) to ensure a black con-

gressman. And to achieve that, you

often must draw the district lines

Liberal Democrats

in exotic ways.

# Building a Bridge for the U.S. to the PLO

#### By Philip Geyelin

WASHINGTON - If Secretary of State Alexander M. Haig Jr. meant to imply what he seemed to be implying on ABC's "Issues and Answers" the other day, a promising breakthrough in the Reagan administration's approach to the never-ending Middle East crisis may be at hand.

OTTAWA — An ironic twist deprived Pres-ident Reagan of a clear foreign policy tri-umpb at the summit meeting in Ottawa. The president brilliantly defended U.S. economic

policy against such heavy hitters as Chancellor Helmut Schmidt of West Germany, President Francois Mitterrand of France and Prime Minister Pierre Elliott Trudean of Canada.

But a sudden burst of tension put the Mid-

dle East front and center at the summit. So

there emerged, at a time of true danger, when it is particularly difficult to deal with Israel's Prime Minister Menachem Begin, new doubts about the president's own grasp of foreign pol-icy and about the status of his chief advisers.

Daily appearances in Ottawa gave fresh evi-dence of a lack of order in relations among presidential counselor Edwin Meese 3d, Secre-

tary of State Alexander M. Haig Jr. and the national security adviser, Richard V. Allen. The three men briefed journalists on all kinds of foreign policy questions in a fashion so ran-dom that there seemed to be no formal lines of

authority. Unwillingness to seem critical of Israel comprised the distinctive oote in all their com-

ments. At a time when the Israelis were re-

sponding to Palestinian attacks from southern Lebanon by bombing the daylights out of Beirut, the president's policy advisers talked as though nothing much was amiss.

"We're very hopeful that a cease-fire will re-sult," Mr. Allen said a few bours after Mr. Begin put off for a full day an urgent cease-fire plea from the roving ambassador Philip C. Ha-

A couple of hours after Mr. Begin post-poned, Mr. Mcese announced, as if it could go either way, that the president would shortly

As for the U.S. role, the secretary took note of two meetings the U.S. special envoy, Philip C. Habib, had with Israel's Prime Minister Menachem Begin last Sunday. And in the next breath, he spoke pointedly of "active" U.S. efforts to promote a cease-fire centering on the United Nations, the "European partners" and

side. In fact, in the interest of helping it hlow over faster, perhaps one should emphasize the lighter side. For a start, there is something charmingly anachronistic about a dispute involving a Spanish king and a British prince over Gihraltar, which was ceded to Britain hy Spain along with Minorca under

tween the quarreling houses. Somehow we douht that either option will be required this time around. The reasonableness and goodwill of Spaniards and Britons alike should suffice. Rule Britannia! Viva Espana! And cheers to the royal couple.

INTERNATIONAL HERALD TRIBUNE.

# The Right Way on Rights?

It can come as no surprise that the Reagan administration is putting into practice its own clearly stated policy on human rights. The latest instance is the lifting of U.S. objections to certain development loans to Argentina, Chile, Uruguay and Paraguay, police states all. These objections had not actually hlocked any loans. Development presumahly has the potential to benefit the common people, and the whole idea of penalizing them for offenses committed by their (unchosen) leaders is troublesome. Still, the objections had signified U.S. concern for human rights, and their lifting will be widely taken as signifying just the reverse.

Is that fair? It prohably is. The chief difficulty lies in the hlanket nature of the decision, which hrushes past local complexities and treats all four affected countries as thought they were the same. They are not. In Argentina, for instance, notwithstanding Jacobo Timerman's indictment of the regime, the actual brutalizing of people has notably declined.

In Chile, on the other hand, two U.S. doctors have just reported that as recently as May, for having treated the victims of government-sponsored torture, three Chilean doctors were arrested, isolated for weeks, blindfolded and forced to listen to the screams of other prisoners. The Americans found a "significant increase" in rights violations, with a new emphasis on psychological terror, since the Chilean constitution came into effect in March.

The administration believes that "quiet di-

Seventy-Five Years Ago July 24, 1906

ST. PETERSBURG — The situation in Russia still remains critical. The Duma dissolved by the Czar is holding its sessions in secret at Viborg in Finland, where the president and other officebearers belonging to the Labor party and the Socialists are presiding over the meetings of two-thirds of the members. A manifest to the Russian people is being prepared, calling oo them not to pay taxes or furnish conscripts for the army. Troops continue to pour into St. Petersburg, where the greater state of siege has been proclaimed. The authorices have seized the principal newspapers. The news from Russia has caused something like panic on the Berlin bourse and a heavy fall of securities in Paris.

1

plomacy" is the appropriate and exclusive way to soften the conduct of friendly governments on rights. What remains to be seen, however, is not merely whether this approach will be effective hut whether it will be seriously tried. Wiping four different Latin slates clean at one swipe does not huild confidence in either the administration's discrimination or its intent.

The question also remains open of what tools Mr. Reagan has that would let him influence the Soviet Union's human rights conduct, for the situation there is hleak. Several dissidents have been arrested and sentenced. Among them was Victor Brailovsky, organizer and host of the Moscow Sunday seminars, where scientists and mathematicians denied emigration visas meet to work in their fields.

All this is happening just as the support tendered to Soviet scientists hy their Western counterparts is starting to wobhle. With Ronald Reagan in office some scientists are coming to feel that contacts hroken to help human rights should be knit up in an effort to restore momentum toward arms control.

This is a bad idea. Suspending exchanges to help Soviet scientists is a sharp instrument as well suited as any to its intended purpose. Resuming exchanges to promote arms control is a hlunt instrument quite unsuited for its purpose. Human rights was never meant to be a governmental preserve. Citizens have always had a critical role. This is no time for any important group of Americans to drop out

THE WASHINGTON POST.

#### In the International Edition **Fifty Years Ago** July 24, 1931

PARIS --- England's Davis Cup team moves back into Rolland-Garros stadium this afternoon for the challenge round against a veteran French team that woo the cup at Germantown in 1927 and has successfully defended it each year since. The draw made yesterday brings Bunny Austin against Henri Cochet, ace of the French squad. When this match is finished, Fred Perry. of the challenging team, will meet Jean Borotra. If the Cochet of this afternoon is the same Cochet who defeated Tilden and Lott so easily a year ago, be should prevail. Such is this little man's genius for the game that should be bring to the court today something approaching his top form, the odds would swing in France's favor.

What Mr. Haig was implying is that the administration has accepted the necessity of dealing, however circuitously and coverily, with the Palestine Liberation Organization.

It will be denied. As candidate and as president, Ronald Reagan has consistently castigat-ed the PLO as a vicious ontlaw group with which he will have no truck. Henry A. Kiss-inger's 1975 commitment to Israel to do nothing that would confer any sort of formal recognition of the PLO (until that organization rec-ognizes Israel's right to exist) is no less an arti-

cle of faith with the Reagan crowd. On the contrary, the Reagan administration has declared global war oo international ter-ronism in general, with the PLO at the top of romain in general, with the FLO at the top of its bill of particulars. And yet, if there is any logic in the strategy Mr. Haig laid out for "tamping down" the escalating violence in (and from) Lebanon, it has to lead inexorably to the opening up of some sort of channel be-tween the United States and the PLO.

Why? Because when Mr. Haig speaks of the U.S. purpose as "hopefully to achieve a ceasefire," he can only mean a ccase-fire between Israel and the PLO — or as be put it, "the two protagonists in this situation." Perhaps even more significant was his statement that "we must recognize the anguish associated with this terrible prohlem — and that this anguish his both sides."

**Deadly Playground**

DORIE BAKER.

friendly Arab governments

The United Nations, while it has played a useful peacekeeping role more than once in the Middle East, is not likely to be able on its own to mediate a cease-fire between Israel and the PLO. But it is one place to head for if you are trying to strike up a connection with the PLO. (It was former UN Ambassador Andrew Young's misfortune to get caught trying to just that; the uproar from Israel forced him out of . the Carter administration.)

The European allies are somebody else you turn to. Central to the so-called European "ini-tiative" in the Middle East has been an effort to build a bridge between the United States and the PLO. The potential for constructive intervention by the more moderate Arabs, as a go-between with the PLO, is evident.

In short, if what's afoot is a delicate, multifaceted U.S. diplomatic effort to arrange some sort of "moderation," if not absolute cessation, of the violence between the PLO and Israel, that strikes me as a far sounder approach and a far more effective form of pressure on Israel — than delaying the delivery of F-16 fighter planes. The diplomatic equivalent of being sent to bed without supper is not going to deter Mr. Begin as long as the PLO continues to shell Israeli villages. Still less are indiscriminate Israeli air attacks

hut reinvesting in "productioo" (i.e., we're putting those lazy South African miners back to work, and getting those idle underpeid Swiss bankers on their feet again), but we're also aiding the indigent by giving them a sense of self-esteern. #### Statute of Limitations

In his article about the recent trica's shameful foreign policy. Mrs. Kirkpatrick calls Latin American Nazis our "friends," labels them als of war criminals in West Ger-many, "War Crimes: Justice or History?" (IHT, July 17), John Dornberg regrets the leniency of the sentences imposed. But he fails "authoritarian" instead of fascist, and we all sleep better at night, firmly deluded that in addition to to mention a most pertinent factor. Under external political pressure, might we also have righteousness on our side. At the very least, let's stop kidding ourselves. Before it's West Germany was forced to repeal her statute of limitations. It is oo wonder that West German judges are less than enthusiastic to follow a pattern that runs against the legal tradition of their country. European penal statutes assume that a person who has not commit-I have ooticed different reactions

proof is practically impossible. Mr. Dornberg is quite justified in his indignation. But his lamen-tations belong rather to the moral and religious areas. Man's justice

is very imperfect. For the kind of justice Mr. Dornberg is claiming, no amount of human retribution could make up for the Holocaust or, for that matter, for many other monstrous crimes committed on Earth. A. TORRENTS DELS PRATS.

Ger

If, instead of being drawn intor<sup>4</sup>, one district, those black voters one district, those black voters were allocated between, say, four districts, each of which then be-came, say, 25 percent black, the re-sults probably would mean that none of the four districts would elect a black, but each of the four would be significantly more apt to elect a liberal Democrat. However, with those black writers concentrate the Middle East peace process. with those black voters concentrat-ed — at their will — in a single district, those other districts are more apt to elect Republicans or conservative Democrats. ted a crime for 30 years can hardly be considered a social danger. Whatever the victim of a crime

And as recent events in Congress have shown, the most importmay feel, the only justification for society imposing a penalty on one of its members is its own protecant question about a district may oot be whether it elects a Repubbcan or a Democrat but rather, if it elects a Democrat, what kind of Democrat he or she is. tion. Another no less important ar-gument is that 30 years after the perpetration of a crime, judicial

The elections of 1982, the first since the 1980 census, will be the first of five that will reflect the demographic changes of the 1970s. Mr. Scammon thinks the 1982 Mr. Scammon thinks the 1982 election may be a contest between history and demography. History says the party not controlling the presidency gains in off-year elec-tions. But demography says that the Democratic Party depends on a number of declining districts. And in a democracy, demography is destiny, sooner or later. Ol981, The Washington Post.

INTERNATIONAL HERALD TRIBUNE, FRIDAY, JULY 24, 1981

# Even in 'Tough' Tokyo District, Crime Is Low, Police Are Liked

By Henry Kamm New York Times Service

TOKYO - Ikebukuro, in west-TOKYO — Ikcbukuro, in west-ern Tokyo, is a teeming district with bars, cheap cating places, por-no shops, Tarkish bains that serve as cover for prostitution and two dozen "love hotels," where rooms can be rented by the hour. At mght, its narrow alleys are awash with garish lights, and hawkers unge strollers into aleazy places. It should be bad duty for the po-licemen of its central precinct, and by Tokyo standards it is consid-ered quite tough. Its patrolmen walk their beats in twos or threes instead of singly, at is standard in instead of singly, as is standard in this city of 11.6 million people po-fieed by a force of 44,140. They do so because drunkenness can make people quarrelsome and difficult in handle sometimes, explained Superintendent Tamotsu Ogiwara, who heads the precinct patrol

force. Nameless Streets

Pitiza bours spent at a substation in the hours spent at a substance was Paties lodged and no arrests were made. <sup>1210</sup> The only suspens questioned were <sup>2210</sup> (men pushing bicycles that, despite <sup>22</sup> arousing patrolinen's suspicions. reproved to be owned and registered 05 by the suspects.

The only harsh treament is a standard out was by an angry mother com-the built was by an angry mother comtheir homework, went in search of their father at a game parlor but here lost sight of him. Told by a solicitous policeman not to punish the size girls, the mother agreed and took

slaps and angry words. The only other callers at the station, manned by five officers, were T-10153 people seeking directions in this city without names for most of its streets and a youth coming to re-pay a debt of about \$2 that he had Meining to re-Meiting incurred the day before, when he

had run out of fare money. He had received the loan against his signature and thumb print.

Now and again, an officer flicked onto a television screen images being recorded by one of six cameras strategically situated throughout the subprecinct. All was orderly.

On foot patrol, three officers spent most of their time in a small spent most of their time in a small park. They ignored the closely entwined couples but spenn a quar-ter hour joshing with two groups of drunken vagrants, with whom they were on familiar, backslap-ping terms. Without appearing to be intercogating him, an officer managed to record the name of the only unfamiliar vagrant and got the mar to open his bag to let him see the contents.

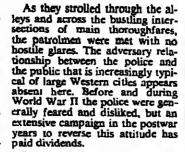

Bhutto's Widow

**Reported Freed** The Associated Pres KARACHI, Pakistan - Nusrat

Bhutto, the widow of executed for-mer Prime Minister Zulfikar Ali Bhutto, has been released from jail after four and a half months' "preventive detention," according to a ranking provincial official.

Mrs. Bhutto was arrested March 8 during the 13-day seizure of a Pakistani airliner. The government said the hijackers were linked to the banned Pakistan People's Parwhich Mrs. Bhutto heads, but denied any direct connection. No reason was given for her release Wednesday.

On Wednesday night, a member of Mrs. Bbntto's household said she was ill and under doctor's orders not to talk on the telephone. But a provincial official said she "perfectly healthy" when she left the jail. Her eldest daughter, Benazir Bhutto, was also arrested March 8 and remains in custody.

In conversations with senior po-lice officials, the importance of the population's confidence in the police and active cooperation with the force were singled out as the most important elements in crime prevention and in the high rate of uccess in apprehending criminals.

Statistics recently published by the National Police Agency contin-ued to record a decline in violent crimes. In 1970, a total of 105,714 violent crimes were recorded throughout Japan; the 1980 total was 52,307. Murders declined from 1,853 in 1979 to 1,684 last year.

Firearms Little Used

Two murders were committed in ikebukuro last year, one remains unsolved. Of the 4,607 penal offenses committed in the precinct last year, their was by far the most frequent, but only 12 cases in-volved the use of force or arms. Eight have been solved. Seven cases of rape occurred; all were solved.

Although all policemen carry re-volvers in addition to truncheons, Tokyo policemen used them only three times in the last five years, each time to fire warning shots.

Four officers were killed in the line of duty in the same period. Senior officials reported police morale to be high, an affirmation not belied by the officers in the Ikebukuro precinct. The average base pay is \$565 a month, augmented by regular bonuses.

## **Government Doctors Reportedly Find** Hinckley Can Be Tried in Reagan Attack

2.1.212 By Robert Pear 112 V XX-2 New York Times Service WASHINGTON - Several government psychiatrists have tenta-tively concluded that John W. Hinckley Jr. not only is competent

to stand trial in the shooting of assassination attempt last March. 1.51.22 Mr. Hinckley was arrested at the

scene of the shooting on March 30 and accused of attempting to kill The president, who was wounded in the chest as he emerged from a ho-title. Also wounded in the assassination attempt were James S. Brady, White House press secretary; Timothy J. McCarthy, a Secret Service agent; and Thomas K. Delahanty, Mr. Hinckley is at the Federal Correctional Institution in Butner, - - N.C., where he has been since April 2, undergoing a court-or-dered psychiatric examination, A

here has been re U.S. g - - viewing the evidence against him, -:- -: and is expected to return an indict-

Mr. Hinckley's principal defense attorney, Vincent J. Fuller, has never publicly questioned his ctient's competence to stand trial. He told the court last April that he was considering raising an insanity defense. However, he has not given formal notice that he intends to raise such a defense and is not required to disclose his plans until

after the indictment is returned. Mr. Fuller insisted in court last April that psychiatrists chosen by the defense team should have full access to Mr. Hinckley at the North Carolina prison. None of defense team's psychiatrists has been publicly identified. But three doctors confirmed that they had become involved in the case at

Mr. Foller's request. They are Dr. Thomas Carl Goldman, a Washington forensic psychiatrist who has testified in

ceded there might be some debate about whether he could conform his conduct to the dictates of the School of Medicine in Baltimore and director of the Maryland Psychiatric Research Center; and Dr.

David Michael Bear, an assistant professor of psychiatry at Harvard Medical School, who works in the behavioral neurology unit of the Beth Israel Hospital in Boston. Dr. Carpenter is an internation-

al authority on schizophrenia. Those who take the view that Mr. Hinckley was mentally ill see paranoid schizophrenia as a likely diag-nosis because, according to psychiatrists, it is the illness most commonly associated with long-lasting

defusions. In Mr. Hinckley's Washington and ideas. hotel room, federal investigators found a letter suggesting that he was infatuated with Jodie Foster, the movie actress.

ional Herald Tribune

VIGNON, France - This an-cient city, once the refuge of popes, is packed with visitors for the Avignon theater festival. Though there seems to be no dancing on the bridge on the neighbor-ing river Rhône, as the old song relates, a holiday spirit reigns and the talk everywhere, in a medley of tongues, is theater.

This year marks the 34th anniversary of the annual festival, which was created by Jean Vilar. Vilar, who guided its fortunes until his death in 1971 - in addition to managing the Théâtre National Populaire of Paris from 1951 to 1963 — is its patron saint.

At the premiere of the 1981 season, President Francois Mitterrand paid trihute to Vilar's integrity and contribution. There are to be other tributes, too. Philippa Wehle, a professor of French culture at the State University of New York long a follower of the Avignon fes-tival and now on its staff — who knew Vilar well, has just completed a book, "Le Théâtre Populaire selon Jean Vilar," which is to be published this fall.

Bernard Favre d'Arcier, 33, the uewly appointed director of the Avignon festival, comes from the Culture Ministry, where he recent-ly prepared an exhaustive report on audiovisual possibilities. He did not know Vilar or see his productions, but he has given deep study to his famous forerunner's career

#### Broad Scope in '81

His directorship will occupy him year-round. When the current festival ends in August, he will travel to Japan, China, the Soviet Union and the United States in search of uest companies for next season. A

# An American Specialist in Chardonnays

Wine

By Terry Robards By Terry Robards New York Tomes Server R UTHERFORD. Calif. — The man is halding and deeply tanned from the unreleating sun that bakes the vineyards. He is of medium height and wears sandals, gray slacks and a purple shirt open at the neck. He speaks with an ac-cent, sometimes lapsing into his native Croatian when talking to a countryman on the telephone.

nalve Croatian when talking to a countryman on the telephone. He is Miljenko (Mike) Grgich (pronounced Gur-gich) of Grgich Hills Cellar in Rutherford, in the heart of the Napa Valley, and he may be the best maker of white wine in the United States. His spe-rially, is chardware, the heart cially is chardonnay, the basic grape of France's white Burgundy, and he makes chardonnays that challenge the very best France has to offer.

"I'm not calling myself a winemaker any more," he said. I'm a wine silter. I sil with the wine and see what it needs. Maturing of the wine is very important. Every point - the best grapes, the

Every point — the best grapes, the best equipment, the best people, the best care — I'm trying to do every point the hest." He has been coming very close to the best for years. It was his chardonnay that helped thrust Cal-ifornia wines into the world spot-light on May 24, 1976, in a hlind tasting competition in Paris. At the time he was the winemaker at Château Montelena another Nana Château Montelena, another Napa Valley winery, and Montelena's 1973 chardonnay took first place, defeating some difficult competi-

well, and is was a benchmark event, recorded in headlines all over the world and signaling the arrival of California viticulture. It was the first in a lengthening string of blind tastings in which California wines have shown their superionity.

#### Winner's Circle

Mike Grgich's wines seem to reach the winner's circle often, There have been gold medals at wine expositions and first places in private tastings. Last fall in a Chicago showdown involving 221 wines made from the chardonnay grape in several countries, a Grgich wine finished first, the Grgich Hills chardonnay 1977, vinified from Sonoma grapes trucked to the Grgich Hills winery.

With backing from Austin Hills, formerly of Hills Brothers Coffee, Grgieh Hills Cellar was started on July 4, 1977, and Grgich, now 58, began his first crush two months later, when he made the wine that won the Chicago tasting as well as another, from Napa Valley grapes, that won a gold medal at the

Orange County (Calif.) Fair. The Grgieh chardonnays are rich and complex, with flowery aromas and intense fruitiness balanced by the wood of the French oak barrels in which they are aged.

ity, but not in quantity." said Grgich. "We believe that our wines connoisseurs search for in are improving every year, and that is our goal."

Page 5

Besides his celebrated chardonnays, Greich produces Johannis-berg riesling, zinfandel and fumé blanc, and last year made his first cabernet sauvignon. "I want to be known as the house of chardonnay," he says, "but not all people prefer chardonnay. I wish I could make only one wine, but I want to have more wines available.

The modern Grgich winery sits amid the vines close to the high-way that runs north-south along the floor of the Napa Valley. There is a 20-acre vineyard behind the huilding, plus 140 more acres owned by Austin Hills in another location. "Mr. Hills has the grapes, and I have the know-how," Grgich said, with a wink.

He comes to work seven days a week and is usually the first one in, unlocking the chain across the driveway and turning on the irrigation system if the weather warrants it. "That's the bonus of owner-ship," he said. "You can come in on Saturday and Sunday and nobody chases you out."

His wife, Taujana, is also from . Croatia, and his daughter Violet, 16, is interested in wine. "I hope one day she will become another winemaker and will take over when 1 crumble down." Grgich

lectures on their work and theories and visiting theater representatives hold discussion periods. This week sees the arrival of a theater company from the Soviet Union: the Roustaveli Theater of Georgia, which is presenting Shakespeare's "Richard III" and Brecht's "Caucasian Chalk Circle" - in Georgian - in the courtyard of the Palais des Papes.

Claude Giraud as Cleon and

Catherine Samie as the nurse - is

#### No Progress Reports

Neither the judge, federal pro-secutors nor defense attorneys has received formal progress reports from the government psychiatrists,
 who are still working on their evaluation of Mr. Hinckley. But medi-uation of Mr. Hinckley. But medi-the cal and legal sources familiar with the case confirmed the existence of Liberal the case confirmed the existence of preliminary findings to the effect that Mr. Hinckley was both fit to stand trial and sane at the time of the crime. Those are the issues that the government psychiatrists are supposed to address in their re-DOTL.

> · Under a rule laid down by the U.S. Court of Appeals, a person is not responsible for criminal con-duct if, at the time of the offense, as a result of a mental disease or defect, he "lacks substantial capac ity to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of the law."

U.S. law enforcement officials said Wednesday that Mr. Hinckley clearly knew right from wrong at the time of the shooting, but con-

### **3** Are Sentenced In Kosovo Riots

BELGRADE - Three ethnic Albanians were sentenced to prison terms ranging from six to eight years Thursday for anti-state activ-ities in the first of a series of trials growing out of Albanian national-ist riots in Yugoslavia's Kosovo - province.

The official news agency Tanjug said the three men last year formed a clandestine group called the Peo-ple's Liberation Movement of Kosovo with the aim of destroying Yugoslavia's constitutional order and its social and political system and forcibly annexing the province to neighboring Albania.

The leader of the group, Bislim Bajrami, 31, was jailed for eight years and Jakup Redzepi, 25, and Ismail Makici, 24, were sentenced to six years each. The trial was held at Kosovska Mitrovica, a town in Kosovo where at least 9 persons died and more than 250 were injured in the riots last spring, according to official ligother criminal cases; Dr. William ter and to win her heart.

### House Ignores Request by Reagan, Votes \$157.5 Million for the Arts

#### The Associated Press

the Arts.

WASHINGTON - The House has rebuffed President Reagan's request to halve U.S. government support for the arts, approving a \$157.5-million hudget next year for the National Endowment for

PROFITING FROM PEST - Joan Levine of Santa

Cruz, Calif., models a shirt bearing a caricature of the

Mediterranean fruit fly, an insect that has threatened much

of California agriculture. Many entrepreneurs have been busy trying to make money with fruit fly memorabilia.

The appropriation passed Wednesday is only 10 percent less than the \$175 million proposed for fiscal 1982 by President Jimmy Carter before he left office in Janu-At the same time, the House ap-

proved a \$144.6-million appropriation for the National Endowment for the Humanitics, which makes aid grants to literary and scholarly pursuits including museums and libraries. Mr. Reagan proposed cut-ting the Carter budget of \$169 mil-lion roughly in half.

The battle over the arts budget is far from over, however. On Tuesday, a House-Senate confer-ence committee agreed on budget authority - or a spending ceiling - of \$119.3 million in fiscal 1982 ary. Mr. Reagan wanted to cut for the arts endowment and \$113.7 that figure to \$88 million. million for the bumanities endowmillion for the bumanities endowment

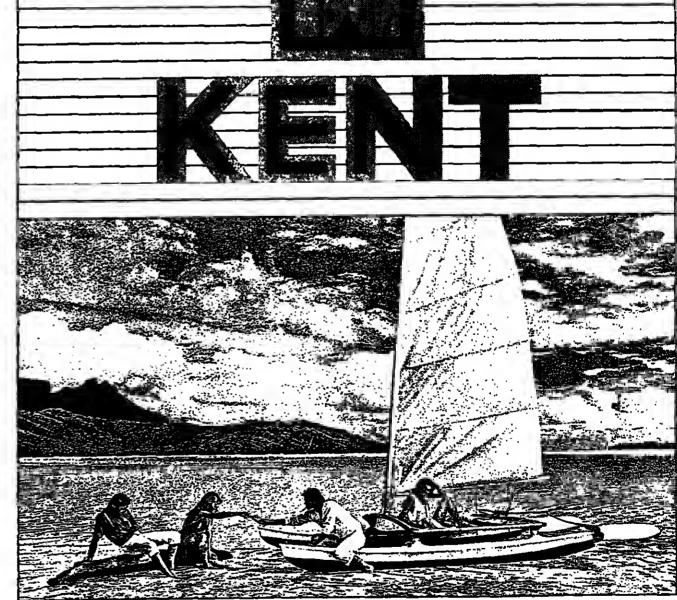

Mnouchkine - a study of the kings of Shakespeare — is already scheduled for 1982. The 1981 program that d'Arcier has arranged is of broad scope. It includes Stuart Scide's staging of Racine's "Andromaque"; "Marie-Woyzeck," scenes from Georg Blichner's unfinished play, with allusions to his life, directed by Manfred Karge and Matthias Langhoff; "Sister Suzie Cinema." in Lee Breuer's mise-en-scene; the Sankaï Juku dance troupe of Japan in "Bakki" and the Nederlands Dans Theater in a ballet program. Five major productions alternate in the huge space of the Palais des Papes' Cour d'Honneur with the walls of the castle as their back-

Daniel Mesguish's production of "King Lear" was scheduled for live television broadcast from the Palais des Papes last Friday. When a storm broke over the open-air arena, a recording was substituted for broadcast but, while the down-pour drenched the players and the audience, it did not halt the performance. Spectators equipped with umbrellas opened them, but this blocked the view of the umbrella-less and objections were voiced. Few members of the audi-ence deserted, a testimony to the spectacic's holding powers.

The Mesguich mise-en-scène bas ingenious aspects. Thierry Delory's decor reproduces the palace in miniature to suggest, one sup-poses, the small world in which the drama transpires within the greater world. In every masterpiece there is a streak of the ridiculous, as Proust observed, and it shows often in this mighty tragedy of Shakespeare.

The acting style is clamorous, perhaps due to the expanse of its setting. Eric Frey's Fool may not speak more than has been set down, but he has, according to custom, incorporated comic trick-eries of his own into the interpretaton; the direction, too, verges toward parody at times. The Lear of Philippe Morier-Genoud has force as well as sound and fury. but he is only every other inch a king in denoting fallen majesty. Yet in the face of this the indestructible play charges on to reach its goal, exciting and moving those who sit before it. The Comédie-Francaise has

unveiled its production of Euri-pides' "Medea" in the Palais des Papes. A constructivist structure, resembling the avant-garde scenic design of the 1920s, dominates the courtyard. On this crimson object and before it the Greek tragedy is performed. The company — with Christine Fersen giving an elo-quent rendition of the sorceress who avenges berself on the faith-

A SPECIAL SUPPLEMENT

# New Projects Signal a Policy Shift

By Robert Hecht A LTHOUGH regional cooperation in the exploitation and processing of West Afri-ca's substantial mineral wealth has until now

CAPITA GAINS

RESEA

vanced "dry" method, has an initial capacity of 1.2 million tons a year, with potential for increases up to 2.4 million tons annually. The clinker is being supplied to the cement industries of Togo, the Ivory Coast and Ghana, the three countries with the largest shares in the \$300-million project. Each has 30.7 percent of Cinnao's equity, with private investors taking the rest of the share capital.

successful regional mining venture but also as an example of cooperation between two Francophone countries and one Anglophone nation that historically have had few economic links. The \$300-million chemicals project under construction in Senegal, the Industries Chi-miques du Senegal (ICS), is designed to con-vert Senegal's phosphates into feruilizer for ex-port to other West African countries. Chemi-cal fertilizers are becoming increasingly important in the region's agriculture as ECOWAS member countries strive to boost their production of staple grains, including rice, millet and maize.

**Challenge of Freer Trade** Facing 16-Member Group

Early organizational difficulties have been overcome and recent differences over a defense pact and a freedom-of-movement protocol also seem to be surmountable.

been virtually nonexistent, the recent start-up of several projects appears to signal change in the mining policies of the ECOWAS member

The first important regional project, a lime-stone mine and factory for producing cement clinker in Togo to supply the neighboring countries of Ghana and the Ivory Coast, was opened in March, 1980. Construction of the second scheme, a chemicals complex in Sene-gal for the manufacture of phosphate-based fertilizers destined for the Ivory coast, Nigeria and other West African nations, began in

April and is expected to be completed in 1984. There are other signs of growing regional cooperation in the development of natural resources, mainly through direct investment by the richer countries such as Nigeria in mining ine noner countries such as Nigera minning projects, in other parts of the subcontinent. Until now, most of West Africa's mineral wealth, including iron, phosphates, bauxite, oil, diamonds and gold, had been extracted with the participation of West European and U.S. mining companies for export in unpro-cessed form to the West.

#### Little Involvement

In many cases, Africans have had little involvement in the management of these mines. In addition, few processing plants have been built in the West African country where the finneral reserves are located, which would have served to integrate mining into the local economy, providing jobs, revenues and foreign exchange savings. One reason for the underdeveloped state of

West African mining and for the lack of re-gional cooperation in this potentially vital eco-nomic sector is that most West African coun-tries do not have the financial resources or the technical expertise to embark single-handedly on such large-scale and sophisticated projects. on such large-scale and sophisticated projects. Another reason is that most West African countries, with populations of less than 10 mil-lion, do not have large enough internal mar-kets for processed mineral products such as steel, aluminum, fertilizer and cement to make local processing facilities economically viable.

Iocal processing facilities economically viable. ECOWAS may help to promote the develo-ment of such local facilities by eliminating tar-iff barriers on trade in raw materials and un-processed mineral products among member states, thus providing a market of more than 150 million consumers. This would permit iron-exporting countries like Mauritania and Liberia, for example, to supply ore to Nigeria's planned steel factories. Conversely, it would allow Nigeria to sell a part of its steel output to other West African nations with expanding metallurgical and construction industries, such as the Ivory Coast and Niger.

#### Model for Region

The limestone quarrying and cement facto-ry, the Societe des Ciments de l'Afrique de l'Onest (Cimao), may turn out to be the model for regional cooperation in minerals development.

Cimao started last year to exploit limestone at Sikakondji, about 40 miles northeast of the Togo capital, Lome. Reserves are estimated at about 200 million metric tons, large enough to keep the mine in operation for at least 50

The nearby processing plant, which turns the limestone into high-quality clinker by heat-ing it to a very high temperature using an ad-

a service managements

12

#### Foreign Aid

Financing for the scheme was advanced by a group of foreign aid agencies and countries, led by the World Bank with \$60 million, and including the European Economic Communi-ty's development fund (\$24.2 million), West Germany (\$25.9 million) and France (\$18.4 million)

The Ivory Coast's national shipping firm, Si-tram, has recently been awarded the contract for the transport of Cimac's clinker to Abid-jan, the Ivory Coast capital, a sign that the project is having positive spillover effects into other areas of the West African economy.

Cimao is unusual not only as a case of a

#### Indian Forms

Output of 210,000 tons of solid fertilizer a year, including 45,000 tons of uple superphos-phate and 165,000 tons of diammonium phos-phate, planned for 1984, will be exported mainly to the lvory Coast and Nigeria. Both countries hold 10 percent of the share capital in ICS.

In addition, about 200,000 tons of phos-

(Continued on Page 10S)

#### Assessment

An interview with Aboubacar Diaby-Ouattara (above), executive sec-retary of ECOWAS, appears inside. In it, he assesses the growth of the group and sees a definite improvement in the relationships between countries in West Africa.

..................... Atlantic Ocean NOC:RA S А Cape Mauritania Verde Is Senegal Mali Niger Gambia Guinea Bissau I Guinea Volta Nigeria lvory Coast Ghana Liberia Equatorial Guinea 1000

E

. . . . . .

By Richard Synge A DELEGATION of the Economic Com-munity of West African States (ECOWAS) led by Executive Secretary Aboubacar Diaby-Ouattara spent the first work of July in Information commerce notes with weck of July in Jakarta to compare notes with a similar body, the Association of South East Asian Nations (ASEAN).

Such a study is appropriate for a young community that has overcome its first political burdles and is entering a challenging era of trade liberalization and coordinated project planning.

It has only been six years since West African beads of state signed the 1975 Treaty of Lagos establishing the ECOWAS institutions, notably the Secretariat in Lagos and the Fund in Lone, Togo. Early organizational difficulties, especially rivalry between those two bodies, have been overcome, and recent differences among the 16 member governments over a de-fense pact and the freedom of movement protocol also seem to be surmountable.

The most significant recent achievement of the Community was the beginning last May 28 of the countdown toward a free trade area, following a summit meeting in Freetown, Sierra Leone.

#### Mutual Suspicion

The early mutual suspicion between Nigeria and the French-speaking Communaute Economique de l'Afrique de l'Ouest (CEAO) has largely disappeared, although there is suil an economic, monetary, administrative and linguistic split. The CEAO is not likely to dis-hand itself, and ECOWAS must accept the co-cristence of such smaller regional bodies for some time to come.

The CEAO was until recently seen by Niger-ia as an instrument of French foreign policy designed to sabotage the new Community. Ivory Coast officials have recently been showing enthusiasm for ECOWAS, however, perhaps as a part of their growing realism about the enormous potential for fvory Coast industry in the Nigerian market.

Ivory Coast industry stands to gain hand-somely from the ECOWAS market of an esti-mated 165 million inhabitants if it can overcome French reluctance to accept local equity share participation in Ahidjan-based firms.

Guinea, a French-speaking country excluded from CEAO, has cast itself as an ally of Nigeria, and its leader, President Ahmed Sekou Toure, is one of ECOWAS' most ardent supporters. He recently told Senegalese journalists that such groupings around the conti-nent would lead to the "organization of united action by the African peoples to eliminate the undesirable heritage of foreign domination."

#### **Planning Meeting**

An ECOWAS planning meeting in Conakry, Guinea, last year let the collective imagination run riot and envisaged a central bank, regional trade and development banks, an ECOWAS monetary market, a Community insurance company and companies for air travel, ship-ping, dredging, railways and tourism. These ambitions, while widely acceptable, have been treated with appropriate realism by the ECOWAS Secretariat's planners and are relegated to the distant future.

This year for the first time the Lagos-based Secretariat published some of its sectoral programs, including those for agriculture, industry

and energy. At this early stage of planning, they show a realistic assessment of the neces-sarily long time scale involved in reaching har-monized development in the region.

The agricultural program aims for eventual self-sufficiency in food, a provision of raw ma-terials for industry and improved rural earn-ings. The five-year time span of the first phase takes in one year for a general feasibility study, one year for project preparation and three years for implementation of the "first generation" of projects.

The outline industrial program aims to iden-tify the regional industrial sectors and to draw up master plans for development and cooperauon at the Community level, with particular emphasis on food processing, agro-related in-dustries, production of agricultural imple-ments, construction materials, wood processing, electronics, petrochemicals, pharmaceuti-cals, iron and steel, and vehicles.

#### 'Survival' Projects

For energy, the Secretariat is about to ana-lyze the needs of the 16 countries and to draw up plans for several "survival" projects that could increase efficiency in energy use or in-

troduce alternative energy production. In order in undertake long-term regional planning, the ECOWAS Secretariat is trying to monitor trade, aid and investment flows. It has announced plans to establish an embryonic economic information service by next year. If succeeds, it will be a considerable aid to the advisers and experts who will gather before the next summit meeting in Colonou, Benin, in May, 1982.

For the outside world, ECOWAS is seen as an interesting experiment, but few aid agencies have been willing to commit themselves to multi-recipient projects until the Lome-hased Fund shows itself able in manage complicated

Community projects. ECOWAS delegations have made regular visits to the United States to inform the busivisits to the United States to inform the busi-ness community of investment opportunities afforded by the Community. U.S. officials ap-pear divided — the critics pointing out the danger of over-bureaucratization in such a community and the supporters citing the re-gion's potential for substantial food produc-tion through injections of agribusiness invest-ment and technology. The capacity for ECOWAS to become a project-planning agency will not be proved un-

project-planning agency will not be proved un-til the \$35-million telecommunications project gets under way. If it is successful, many other projects will follow.

**INTERNATIONAL HERALD TRIBUNE, JULY, 1981** 

ECOWAS

# Barriers Gradually Reduced

THROUGH ITS new trade li-beralization program, ECOWAS may soon be providing channels for businessmen and governments to explore economic opportunities together. The liberalization program has

just got under way, with the elimi-nation of tariff barriers on unprocessed products beginning last May 28. With regard to industrial products. ECOWAS-designated priority goods" will be liberalized faster by the lvory Coast, Ghana, Nigeria and Senegal. The products that are to qualify for trade liberalization within the

Community will be those from enterprises that conform with the ECOWAS-designated "desirable level of national participation in the equity capital." The program says that industrial

"Community originating goods" must have 20 percent of their equity capital in national hands as of last May 28. This percentage will rise to 35 percent on May 28, 1983, and to 51 percent hy May 28, 1989 28, 1989.

It is this requirement that dis-turbs the French business community that has long dominated the industry of both the Ivory Coast and Senegal. The rules on the par-ticipation of nationals in the capi-tal of industrial enterprises are described as the crucial problem by a French trade publication because they will provide considerable advantages to ECOWAS industrial exporters and stimulate sharp competition both for foreign-based and locally based industries without the requisite level of participa-

Although the Ivory Coast is said to be reluctant to implement ECOWAS provisions, in recent weeks a number of Ivory Coast officials have spoken in positive terms about the Community.

Planning and Industry Minister Maurice Seri-Gnoleha told the na-tional Chamber of Industry meeting in Ahidjan in June that it was a national industrial development objective to work toward strength-

ening regional cooperation. This was followed by a close public examination by Oumar Diarra, the senior official in Mr. Seri-

ative estimate of the ECOWAS population] instead of one of 7 million will completely change the Ivory Coast's industrial perspectives. The production of a number of intermediary goods, equipment and consumer durables can only be considered in an enlarged market. In the Ivory Coast, many in-

dustrial projects are dependent on this regional dimension."

Ivory Coast industrial exports in 1979 were valued at about \$700 million, of which nearly 25 percent went to ECOWAS countries. The Ivory Coast products that sold well in ECOWAS were petroleum prod-ucts, textiles, steel products, plas-nics, insecticides, paper and pack-aging, cigarettes and instant cof-

About 75 percent of these industrial exports, however, went to the Gnoleba's industry department, of Francophone Communaute the challenge to Ivory Coast indus-try posed by ECOWAS. "The po-I'Ouest (CEAO). Mr. Diarra said

tential market is considerable," he that his country "must intensify its said. "Producing for a market of trade penetration in ECOWAS 140 million inhabitants [a conserv-countries beyond the CEAO" to include Anglophone states such as Ghana and Nigeria.

Although the trade liberalization program may force the pace of lo-cal participation in industry, the member states are free to formu-late investment codes according to their own priorities. In the present climate of recession, several countries have been relaxing rather than tightening their investment codes in the hope of attracting in-

vestment, particularly in mining and mineral processing projects. In a market that has long been dominated hy imports from be-yond Africa, ECOWAS is seeking to achieve a modest improvement of the balance. But even the limited trade exchanges envisaged will not come easily because of the ob-stacles of limited market intelligence, inconvertible currencies and preferential agreements with overseas countries

- RICHARD SYNGE

Transport Infrastructure Projects Are Taking Shape

Ships from nations around the world stop at the active Port of Abidjan, Ivory Coast.

A<sup>S</sup> WEST African empires rose and fell from the Middle Ages to colonial times, trading routes were established to handle commerce in commodities such as gold, salt, cowrie shells, fish, kola nuts, livestock and skins.

Traces of these routes remain for example in the substantial river traffic on West Africa's great waterway, the Niger, or in the no-madic movements of the region's most widespread ethnic group, the Fulani

#### Colonialism

British and French colonialism in the early 20th century saw the construction of railways, roads and airfields that primarily served the interests of the colonial powers and ensured the systematic export of West Africa's key commodities: cocoa, cotton, groundnuts, fruit, palm oil, rubber and some miner-als.

As a result, the majority of West Africa's independent states now look more to Europe and North America for their trading require-Fund estimate. ments than they do to one another, Meeting With Donors

Last month in Lome, Togo, at the headquarters of the ECOWAS Fund, the first fruits of West Africa's search for a unified transport infrastructure began to ripen. From June 8 to 11, delegates of West African states met with potential aid donors for a collective

discussion on a range of West Afri-can infrastructure projects, under the auspices of the UN Economic Commission for Africa.

Projects under examination at Lome — some of which are not likely to be implemented for a long time - included 48 for road links, 60 for air transport, 12 for once efficient road network has de-telecommunications, seven for cayed beyond recognition follow-postal services and four for broad-ing a financial collapse. Ghana's

casting. The projects require total financing in the region of \$2 bil-lion, according to one ECOWAS

Three trans-regional highways were brought to the fore at techni-cal and financial discussions: the cal and inancial discussions: the vital coastal route from Lagos to Nouakchott, Mauritania; the trans-Sahel highway from Dakar to Ndjamena, Chad (just outside the ECOWAS region); and the roads linking West Africa to the Trans-Saharan highway in Algeria. The coastal highway is still far from completion although it has from completion although it has been on the drawing board for at least a decade,

#### **Crawling Progress**

From Lagos to Lome a fine highway is in place, but Ghana's once efficient road network has de-

problems have made aid agencies wary of committing themselves to rescue programs.

> Accra to Abidjan is a link that has seen only crawing progress, while from Abidjan to Dakar the route is interrupted by seven fron-tiers and very hitle of the plan has been implemented,

In most cases, individual coun-tries will have to take responsibili-ty for their own sections of the regional highways, an ECOWAS Fund official said, while the Fund and the Secretariat will supervise coordination and linking.

The first practical test of coordi-nated ECOWAS infrastructure planning will be a telecommunications scheme.

On the basis of a study by the International Telecommunications Union, the national systems of several countries will be modernized

and in some cases coordinated. At present, a high proportion of intra-African telephone and telex link-ing is via Europe, a situation paralleled in air transport. Busy officials and businessmen are used to-having to reach other African destinations via Rome, Paris or Lon-

a the Commun: a program to Other transport projects consid-ered by ECOWAS leaders include the harmonization of road transsues for losse n irom the the contrib

Président de la République Populaire du Bénin. Mathieu Kerekou

Beain has been in the course of an extraordinarily interesting political and social experiment since Uctober 26, 1072. Un that day, young officers of the Beniu Army, under the leadership of Major Mathieu Nérékon, took over the government, after an experiment in "three-headed" government, known as the "Presidential Council" regime, had finally proved its inellectiveness. Because the recent history of this young state has been marked by a number of cours d'étai by the Army. political observers did not immodiately register the charges that were to happen in the country. They were more concerned with estimating the survival chances for the new regime in a state that had become noted for instability.

But things moved last. On November 30, the whole world learned that Benin had chosen the way of socialism, guided by marvism-lemmsm. On December 2, 1974, the state reinforced its structures by national izing certain important sectors of its economy: backing, automobile credit, insurance, oil-products distribution, etc.

November 30, 1975 say the creation of the Party of the People's Revolution of Benin (PPRB), a "revolutionary party nl a new type, because as the avant-garde party of the People's Revolution of Benin it is the supreme political organization of the Benin people." At a time when a promising luture was opening up for this people, through a pulitical experiment to which it had widely subscribed, international apperialism attempted on January 16, 1977 to reverse the course of Justory by an attack on Cotonou. Its mercenaries only succeeded in galvanizing the energy of a people that was fully convinced of the rightness of the course on which it had embarked.

the Max 22, the Central Committee of the Party of the People's Revolution published the text of a draft lundamental law defining the country institutions: It set up a Revolutionary National Assemble, which was to elect the President of the Republic and Chief of State, and the National Executive Council, the "supreme administrative and exec-nive organ of the People's Republic," whereas at local level provision was made for revolutionary councils for provinces, districts, communes, villages and urfam sectors. The draft law was approved by the National Council of the Revolution and became applicable in full munediately. And so Dahomey, once vonsidered as the "sick child of Mrical has became the People's Republic of Benin, and is turning into a society that is plyasant to live in.

#### THE FUNDAMENTAL LAW

On August 26, 1975 the great Revolutionary Movement for the national liberation of the people of Benin entered a new phase of its development

the that day the National Louncil of the Revolution in extraordinary

People's Republic of Benin.

And so the people of Benin had set up two important instruments of patriotic and class struggle, with which to move on to the stage of democratic revolution.

The national commission for the fundamental law had been solemnly inaugurated, following the devision of the National Council of the Revolution, on September 3, 1976 by our great comrade the President Nerekou. This commission was composed of some aventy members; it soon set to work under the direction of the Central Committee of the Party of the People'- Revolution of Benin. In view of the great importance and wide scope of the assignment given to the commission members, the President of the Central Committee gave them precise directives taking into account the changes that had occurred in the life of our country since October 26, 1972.

These instructions clearly indicated the basic relyrence elements and in particular brought to the attention of the commissioners that:

D. Any constitution lass an essential class elements

- 2). The draft fundamental law, whose e-sential political base was to be the Revolutionary Movement of October 26, 1972, should make a fundamental break with the colonial and pre-colonial tradition in legal matters, and should permit:
- In the political field, perpetuation of the strength and unity of the Benin prodution, with solid and efficient institutions, and continuing development of the evolutionary process in the Prople's Republic of Bennie - Institutionally stocking, a guarantee for the people of the politi-
- ical and material conditions necessary to allow it to play its part as the real master of society in our country;
- Again instantionally, a guarantee for the peole of its right to take part in the management and direction of affairs of state; - And from a legal point of view, firm establishment of revolu-
- tionary leadity and a guarantee of progressive reinforcement of the revolutionary state.
- 3) Today, our new type of party, the Party of the People's Revolution of Benni, incarnates the strenght and units of the revolution; it is a guarantee of continents for the work of the resolution and of the interests of the people.

For this reason, to comply with the above requirements, the draft lundamental izw must clearly and unoprivocally lay down the leading role of the Party of the People's Revolution of Bennein the State and in all activities of Benni society.

- 4) Both in content and form, the dealt law must answer the needs of the Benia resolution in its present stage. It must consequently give an account of the historical experiment at present being conducted In the people of Benin at the stage of a revolutionary movement of national liberation, establish the objectives to be attained to consolidate the achievements of this stage, and clearly lay down the tasks to be accomplished to bring our revolution forward to the stage of a people's democratic revolution. These tasks are essentially as billows:
- To relative the leading role of the Party in all matters and lieb:
- To climinate lendal structures in the countryside:
- -- To vario through the agrariant reform:
- To viadeate completely the economic basis of imperialism.
- To bring about effective democratization of power, and in particular by reinforcing the local power base, organizing peasants' consmittees, and creating the organization of the party masses
- To create a wide national union of all the patriotic and revolutionary classes and sections of the country, based on an alliance between workers and peasants.

Taking these previous directives from the Central Committee as their basis, the cummission set to work. The results of its discussions were solenmly presented to the President of the Central Committee on December 14, 1976 in the form of a first draft of the text of the fundamental law for the People's Republic of Benin.

In accordance with the principles established for the organization, management and work methods of our avantgarde party, the Party of the People's Republic of Benin, the Central Commutive processed the first draft by applying dense rate centralism and the mass line

amendments right down front the central committee to the masses o the people through all the existing forms of mass organization in our COUNTRY

The main phases of this cycle of wide democratic consultation were as

- 1] Discussion and amendment of the first draft of the text of the fundamental law by the central committee during its 4th ordinary session in January 1977. The new text adopted after this session became the draft funda-
- mental law, which was submitted for examination and amendment by the masses of the people and all the social classes of our country.
- 2) Presentation and study of the draft fundamental law is joint session of the central committee of the Party, the National Revulutionary Counvil and the Revolutionary Military Government in March 1977.

During this session, the members of the country's governing bodies were informed of the draft text for the fundamental law, so that they could appreciate its full political and historival significance and should thoroughly understand the implications of the various provisions of this text.

This important session enabled all the members of these governing bodies to channel the vast mass movement that was subsequently organized to popularize, discuss and arreved the dealt fundamental

3) A catopaign to popularize, discuss and amend the hyndamental law and state plan. During this phase, the operations were directed by Party members in each of the different district councils. All this work took place under the lirm management of thy central committee which, in us 5th session (May 4 to 7, 1977), Jaid down the program for the national campaign to popularize the staty plan and the draft fundamental law, and prepared the working docuneuts or essars for organizing this compaign.

It was officially opened on May 22, 1977 hy our great comrade Pre-ident Mathicu Kétékun, It was due to close un August 1, 1977 following the sixth session of the central committee.

This sixth session was devoted to analyzing the pupposals and suggestions of the masses of the people, which were basically grouped together in 115 amondments, which take full account of the presecupations of the working people, of the realities of our country and the needs of our resolution.

After examination of these amendments and the final drafting of the test of the huidamental law, the central committee was to subjust it to the first national conference of the Party of the Revolution of Berun, held between August 8 and 16, 1977, and also to a special joint session of the central committee of the national council of the revolution and of the revolutionary military government.

As soon as it had been adopted by these higher bodies of the Party and State, the hoad text of the lundamental law was sent back to the masses of the people in our villages and countryside for close study. This final phase of the long process was devoted to analyzing and explaining the various amendments. Emphasis was played in the with all the colonial and neuscolonial constitutions that had been imposed on our people by imperialism and its laithful allies with the sound and of prolonging indefinitely the oppression and exploitation of the masses of the people.

All in all, the bunkunental law summarizes the revolutionary experence of our working people at the present stage of our great revolutionary movement of national liberation, and gives the objectives to be attained in order to consolidate the victuries that have been you, together with the unportant tasks to be performed to reach the stage of a democratic and popular resulution

INDUSTRY

Société Nationale pour l'Industrie des Corps Gras (SONICOG), a state company with capital of 600.17 million CFA Francs. 1974-75 turn-over: 4.173 hillion CFA.

· .

Texiles Societé Nationale Agricole pour le Coton (SONAGO), a state company, has assumed responsibility sance 1974 for cottua growing. It has 6 plants at Parakou, Bohicon, Savalou, Giazoué, Kandi (2 plants), with a total capacity of 67,500 tonnes of cottonseed. Société Bennoise de Textiles (SOBETEX), a mixed oconomy company (State 19%) with capital of 600 million CFA France. This is an integrated textile manufacturing complex including spinoing, weaving, dveing and finishing, and making falsics, jeans, howery and towelling rloth Iron local cotton.

#### Food industries

La Béninoise, the national brewing company, is a state company with capital of 693 million CFA France. It has a project to build a mmenti-water plant at Possotomes in the province of Mono (planned invest-ment: about 600 million CFA France). Les Urands Moulins du Bénin, capital 240 million CFA Frances (flour-

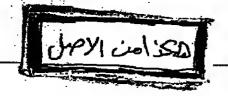

milling). The company is planning to increase its capacity from 100 to 125 tonnes per day and to diversity its output. The major project in the fond industry is the Savé sugar complex. The capital of the company scheduled to manage the complex will be \$50 million (Benin state 55%, Nigeria 40%, the Lonrho company 5%). Other important projects await implementation in this sector; a consector production (SONACRI), a tomato-concentrate plant at Nattingo and aplant lur patracting fruit juice and lemon essence on the citrus growing perimeter of Allabé (province of Zou) by the State company for fruit and vegetables (SONAFF1.).

Two other major projects should be mentioned: the Onigholo rement plant in be developed with assistance from Nigeria, at a total cost of 123 15 million CFA France: and the oil refinery which will require an investment of the order of 25 billion CFA France.

# After Shaky Start, Cooperation and Development Fund Begins to Work

By Gillian Gunn FTER -A+ SHAKY start, the Lome-based ECOWAS Fund

Cooperation, Compensation for and Development has begun to fulfill its role as the regional Com-munity's financial catalyst. The uncertainties over the Fund's auincertainties over the Fund s au-thority that hampered its first years have been resolved under its new managing director, Robert Tubman of Liberia, and the organ-ization is getting its teeth into its first major project, a \$35-million telecommunications scheme.

Established in 1975 with an ini-tial capital goal of \$50 million and anthorized capital of \$500 million, the Fund now has \$48 million in 0C . 2. C . 200 thesh provinces contributions from member states. This is to be used to finance ECOWAS projects, both through equity participation and through loans and loan guarantees. The E-ITPE 2 TREE Testa Min Ma Fund's budget for 1981 sets in-come at \$3 million and expenditures at \$2.7 million.

S. M. Milein

Other Project In the future, the Fund will also ECOW AS baby administer the Community's compensation program to reimburse member states for losses in reve-Sortanates d ge nne arising from the lifting of station, real later Action raises in the barriers. The compensation the Narrath budget will be contributed by a cold value of intra-Community export of the part of intra-Community export of the part of intra-Community export of the part of the compensation. City New and a באוום בתריבו. כו separately from the initial \$50 mil-miles. Similar difficulties exist else-where in West Africa, and some countries have no national tele-phone service.

when trade liberalization has been completed.

Pereira

Although in the long run the Fund's ability to share out compensation in an equitable manner may determine the viability of ECOWAS as a regional market, in the near term the project-financing side is attracting most of the attention.

#### Feasibility Studies

Feasibility studies for the Fund's priority, the telecommunications program, have recently been completed by the Swiss-based International Telecommunications Union. Finance is being raised and tender documents are due out SOOD.

The four-year telecommunica-tions project involves eight inter-national links, eight national projects and 10 external plant and transit centers affecting 13 of the 16 ECOWAS states. Most links will be by microwave lines, with relay stations every 40 kilometers

from which trunk lines can be extended, thereby enhancing the re-gion's rural infrastructure. A satel-lite station is planned for Cape Verde.

At present, a telephone call from Lagos to Lome, Togo, just 150 miles away, must be switched via London and Paris, a total of 6,400

Only \$5 million of the total project cost is to be provided by ects. First, some of the telecom-munications links are not economhe Fund; the rest is to be raised ically viable but bave been through loans from international development institutions and banks, with the Fund providing included for political reasons. For example, several telev-telephonetelegraph lines have had television loan guarantees. A finance meet-ing held in Freetown, Sierra transmission facilities tacked on, pushing them into the red.

ing netd in Freetown, Sierra Leone, on May 20, reportedly made substantial progress toward a financing package, with \$69.7 million in pledges, double the project's total cost. For this reason, some banks have asked to have the project broken up so that they are involved only with the profitable lines, ECOWAS has refused, insisting Several problems characteristic that the package be financed as a of regional development programs are holding up the finance pack-age, bowever, foreshadowing diffiwhole.

Second, disputes have broken out between ECOWAS and comculties for ECOWAS Fund projpeting regional organizations, such

l'Ouest (CEAO) and various river basin organizations, over funds der documents. from the European Economic Community for the telecommunications scheme. These other organ-izations fear than the EEC is about to commit the bulk of its regional development money for West Afri-

Guines

Toure

ca to ECOWAS. leaving little for their own projects. Third, financial backers are concerned by the lack of procurement and supervision regulations for the project. The ECOWAS Fund

agreed at the Freetown meeting to draw up both a supervisory body tion.

as the Francophone Communaute of consultants and a technical Fund's priority is the impro Economique de l'Afrique de committee responsible for issuing of the region's road, rail an procurement regulations and ten-

#### Credit Arrangements

Finally, the project bas been stalled by snags in export credit ar-rangements. The British, French. West German, Swedish and Belgian export credit agencies have been contacted, but negotiations are taking longer than anticipated because many agencies have no ex-perience in judging the creditherent in a 16-member community worthiness of a regional organizaand finance difficulties caused by

projects that are socially or politi-cally useful but uneconomic, After telecommunications, the

The Fund's future activities, diof the region's road, rail and trans-port infrastructure. In mid-lune, bankers and foreign experts met in Lome for initial discussions on firected from Lorre, may also be hampered by its long-standing rivalry with the Lagos-based Executive Secretariat. Conflicts be-tween the Ivorian Executive Secre-tary of ECOWAS, Aboubacar Dianancing for 48 road projects, 60 air transport projects and 12 addi-tional telecommunications links, by-Ouattara, and the Liberian forcosting a total of \$2 billion. mer managing director of the Fund. Romeo Horton, resulted in These projects will undoubtedly run into the same problems as the telecommunications project: com-petition with other regional group-

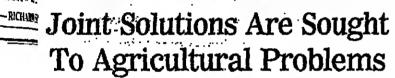

the latter's dismissal in 1978. Mr. Horton's successor. Mr. Tubman, has had smoother relations with Lagos, but recent rumblings regarding the future management of the compensation program may foreshadow renewed Lome-Lagos tension.

# **NNPC IS PIONEERING THE DIVERSE TECHNOLOGIES** NIGERIA NEEDS FOR THE YEARS AHEAD

WHEN YOU THINK OF INFRASTRUCTURE FOR NI-GERIA'S INDUSTRIAL TAKE-OFF, THINK OF NNPC.

PETROLEUM AND ITS BY-PRODUCTS: THE VERY BASICS OF INDUSTRY TODAY AND FOR CENTURIES TO COME.

THE RAPID PACE OF MODERNISATION. THE SPEC-TACULAR INDUSTRIAL DEVELOPMENT IN NIGERIA. THE REQUIREMENTS OF INDUSTRY; OF PLASTIC ENGINEERING, AND AGRICULTURE; OF CHEMICAL

dal to the IHT THE ALARMING increase in governments to review their investment priorities and put more monstatistics, particularly on the tradi-tional food crop sector, are unreli-able, World Bank estimates suggest that, while the population has rown by more than 2 percent a year throughout the area, food crop production has stagnated and in some cases decreased. There are notable exceptions to the general pattern of decline, such as the lvory Coast. But most ECOWAS states have seen their food bills rising as a combination of problems have undermined the agricultural sector. With that in mind, the ECOWAS Secretariat is drawing up a common agricultural policy that aims to pool knowledge about the problems in the rural areas and come up with a joint sohution

electrification and pipe-borne water programs.

L food imports by most All the countries of the region ECOWAS countries during the are also in difficulty over the com-last decade has forced a number of plex land tenure systems inherited plex land tenure systems inherited from the past. The bulk of farming output is by farmers working small able resistance to attempts to ra-tionalize the land tenure system. Nonetheless, there have been successful farms set up in Ghana and Nigeria on previously unfarmed

The policy document is still at an embryonic stage but its main thrust is likely to be in encouraging countries to share information. Joint research institutes could be set up to look at ways of combating insects and diseases as well as developing new strains of seeds resistant to the tropical conditions of the coast or the dry savannas of the interior.

Such a project is particularly close to the heart of the biggest ECOWAS member, Nigeria, which has become a textbook case of de-cane in the agricultural sector. Nigeria was once a substantial ex-porter of rubber, cocoa, palm oil and groundnuts. But since the oil bom the agricultural output of the country has dropped, and it now exports only small quantities of rubber and coccoa.

Food Crops

As for its food crops, despite some government investment in the sector, production has been rising at an average of 1 percent a year for the last five years while the population has increased at an estimated 2.4 percent and the pur-chasing power of citizens has gone up considerably.

At the national level, Nigeria is tackling the problems through its Green Revolution program, which is intended to raise the annual in-clease in agricultural production to 4 percent. But the government recognizes that many of its problams are shared by other countries and it is anxious to study new

ways of combating them. The most common problem afflicting agriculture is the drift of young people into the urban cen-ters. Throughout the ECOWAS region, the average age of farmers is increasing as the cities soak up millions of new arrivals every year. Planners believe that the only hope they have of slowing the trend is to make conditions more attractive in the villages by promoting rural ECOWAS.

فالرهيدها والمعاشلي المصادفين وستعد السيلي وتسترفي والاسترار 20.000

#### Inefficient Techniques

Farming techniques are largely inefficient and, although a number of countries have attempted exten-sion services to improve the standards of farming, there has been litthe success. The schemes bave ci-ther been badly managed (Togo), short of trained personnel (Niger-ia) or simply starved for funds (Ghana). The net result has been a disillusignment of the local farmer disillusionment of the local farmer with government aid and an additional burden on the countries' exchequers.

On all these issues, ECOWAS countries can be expected to pool their experiences and attempt a joint approach even though the real work will have to be carried out at a national level. In their deliberations, the example of the Ivo-ry Coast could prove most revealing because it is one of the few countries on the continent that has increased its food and export crop production considerably since independence.

The World Bank pointed out in a recent report on the Ivory Coast: "From 1965 to 1975, the rural pop-ulation increased 27 percent but produced 42 percent more food. Imports of foodstuffs for each ur-here inchierant declined from 200 ban inhabitant declined from 200 kilograms to 115 kilograms ...." According to officials in Abidjan, the main reasons for their success are a sensible producer price, access to markets and availability of inputs - the farmer does the rest.

The lvory Coast economy grew at a healthy annual average of 7 percent for the last decade almost entirely because of its concentra-tion on agriculture. The greatest benefit for the country has been a more equitable spreading of the benefits of development than in countries like Niceria which has countries like Nigeria, which has concentrated much more of its oil income in the urban areas. The challenge that the Ivory Coast faces is to absorb the money that will soon start flowing from oil into the economy without distorting or destroying its agricultural

For example, much of Ghana's cocca ends up in the Ivory Coast and Togo. Nigeria's cocca crosses the border into Benin, and Nigeri-an groundnuts make their way to Niger Dervice the source food Niger, Despite the acute food shortage in Upper Volta, some of its food does vanish into Ghana. It is an issue that is best dealt with by an international body like

# New Projects Signal a Change in Policy

#### (Continued from Page 7S)

phoric acid, used in the manufacture of ferti-hzer, will be sold to a group of private compa-nies from India, which have taken a 21.6-percent stake in the project. Senegal is the single largest shareholder, with 26.6 percent. The Islamic Development Bank, plus a French chemical company, EMC, which will manage the project, have also subscribed to a part of ICS capital.

Sulfur will have to be imported to produce 560,000 tons of sulfuric acid used in the manu-facture of fertilizer, as will the ammonia, which is one of the components in diammonium phosphate fertilizer.

The ICS project is expected to give a boost to Senegal's phosphate mining industry, cur-rently the second-largest producer in the region after Togo. Senegalese output in 1980 was about 2.25 million tons.

Another mineral processing project with enormous potential for regional integration is the giant \$3.45-billion iron and steel works at Ajaokuta, Nigeria. President Shehu Shagari laid the foundation stone for the project on laid the foundation stone for the project on June 18, and the government hopes that the plant will open in 1983. Construction of the Ajaokuta facility, which is being managed by a Soviet firm, Tiajprom Export, was seriously delayed last year, apparently because the local steel development authority failed to build enough housing for Russian workers on the cita site.

#### Iron Source

There are reports that Nigeria plans to purchase iron ore for Ajaokuta from Liberia, an-other ECOWAS member state, whose iron output has been declining in recent years because of the shmp in world steel production. Mauri-

tania, which has the richest iron ore in the re-" gion, is a second potential source of raw material for Ajsokuta.

The other example of trade in unprocessed mineral resources among West African nations involves Nigerian crude oil, which is delivered to petroleum refineries in other parts of the region. Most of 2 million tons of crude sup-plied to the Ivory Coast annually comes from Nigeria. A part of the refined petroleum prod-uct manufactured in Abidjan is eventually re-exported to the neighboring states of Upper Volta and Mali, providing an extra link in regional trade.

Nigeria has also taken shares in two mining

ventures, which it hopes will guarantee it ac-cess to mineral supplies for its industry. These include a 13.5-percent interest in the Mifergni iron project in Guinea, which is seeking addi-tional financing before it gets under way, and 12-percent share in a planned uranium mine

100.00

#### Mauritanian Industry

Most other current mining activities in West Africa are single-country schemes, with as yet to regional discreticas (index for manual) with more than half of the world's proven banxite reserves, exported about 10.3 million tons of banxite ore and 600,000 tons of alumina in 1980, but both the foreign investors in the mines and the purchasers of the output were developed countries. Two of Guinea's three mines are managed by consortia of West-eta companies, while the third is run by the Soviet Union.

The same story is true for Mauritania's iron. industry, the mainstay of the country's como-my. All of the 1980 production of 9 million tous of iron ore was exported to Europe, and foreign shareholders in the planned \$500-milliou Guelbs iron project are mainly oil-export-ing nations from the Middle East. No West African country has taken a share in Guelbs, which is expected to boost Mauritania's iron ore production to 14 million tons a year in

In Niger, the two uranium mines at Arlit and Akouta, in the north of the country, which and Akonia, in the hold of the country's 4,000 tons of semi-processed metal, or "yellow cake," are jointly owned by the Niger government and several European and Japanese energy firms. The sec-ond-largest producer of uranium in Africa, after Namibia, Niger currently exports all of its yellow cake to countries outside the region, in-cluding a controversial sale of several hundred tons of the metal to Libya in 1978.

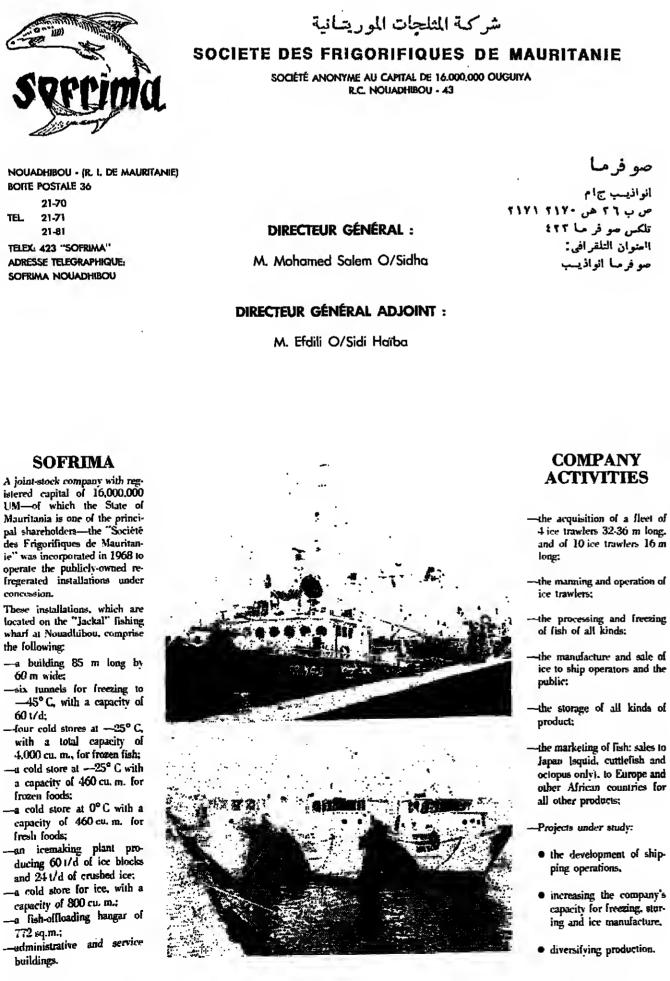

Probably the most difficult promotion of regional economic integration in mining involves. gold and diamonds, because there is no ready market for them in the region and because, in the case of diamonds, they require high-tech-

nology processing. Sierra Leone has traditionally been the lead ing diamond producer in the region, with \$120 million in diamond exports last year. There are reports, however, that neighboring Guinea has far these reserves of the genetione, and the government is socking foreign partners in diamond-mining ventures. Gold production has been declining in re-

cent years, especially in Ghana, but several West African nations hope that the meteoric rise in world gold prices in 1979 and 1980 will give a boost to gold mining. In Upper Volta, financing of \$44.3 million was arranged last year to reopen a gold mine at Poura that has been closed since 1966. Investors, including the Upper Volta government and the French company Coframines, expect to recover about 1.9 tons of gold a year from the mine, worth \$40 million.

#### 1. MR. PRESIDENT: COULD YOU TELL US WHERE YOUR **COUNTRY STANDS IN 1981?**

I'm not sure I understand exactly what you mean by this question.

But one thing I can say: on November 25, 1980, Upper Volta decided to take its destiny into own hands.

The Military Committee of Recovery for National Progress has been working since its institution towards the following end: to unite all the citizens of Upper Volta and give them back confidence in the future of their country, since this future is full of promise provided everyone works together with the same object in mind.

#### 2. WHAT ROLE DOES UPPER VOLTA PLAY IN ECOWAS?

Upper Volta is a founder member of ECOWAS, and as such has the full intention of working towards complete achievement of its objectives. It is sparing no effort to implement the decisions of the Community.

As a country with no outlet to the sea. Upper Volta is whole-heartedly supporting all the efforts of ECOWAS to lay down a policy for communication systems between the member states. Our sub-region can only develop in a harmonious manner if there is dynamic cooperation based on complementarity.

#### 3. WHAT CONTRIBUTION DOES YOUR COUNTRY MAKE TO THE ECONOMIC COMMUNITY OF THE WEST AFRICAN STATES?

Upper Volta has always shown interest in regional and sub-regional groupings whose object is to promote and reinforce cooperation between the African states. It thus fully supports the aims and objectives of ECOWAS, which are to encourage the development and wellbeing of the people who live in this sub-region. To this end, it has regularly attended the meetings of ECOWAS at every level.

We believe that it is through discussion in depth that the problems implied by integration of the member states of ECOWAS will be solved, and especially those involved in the reduction and elimination of customs and other barriers, and in the practical application of the agreement on free circulation of persons and goods within the Community.

# T HIS INTERVIEW with Aboubacar Diaby-Ouattara, executive secretary of ECOWAS, was conducted by Kenneth Macken-zie, the editor of West Africa, short-ly before the summit meeting in Freetown in May, It is reprinted in shorter form from that publication.

KENNETH MACKENZIE: An official pamphlet on the first five years of ECOWAS says: "The main aim of the various institu-tions in the Community has thus far been to make ECOWAS opera-tional" In ECOWAS tional." Is ECOWAS now opera-

ional ABOUBACAR DIABY-OUAT-TARA: The answer is definitely "yes." In order to assess the progof such an organization as-ECOWAS, you have to look at the specific programs and timetables. Another way of assessing progress is to lock at the West African region today and the West African region of four or five years ago, and see if there has been any change in atmosphere and rela-tionships.

secondly, carrying out the basic research to provide the informa-tion we needed to formulate the medium-term work program. I carried on with the work while Mr. Horton made the headlines. This was why, at the very meeting at which Mr. Horton was dismissed, the priority work program of the community, which we are now implementing, was approved. There were complaints at the time that I was not paying attention to public relations, but it was deliberate. I

thought it necessary for us to be left alone for a time. In the life of an organization there are different priorities at different stages. Yon have to be sure that, as yon say in English, you do the right thing at the right time. The right thing at the right time was to set the house in order and

what extent can ECOWAS claim credit for the reconciliation be-tween Guinea and her neighbors. and for the improved Anglophone-Francophone relations?

toward the implementation of the priority programs to see what mea-surus can be taken to consolidate the achievements so far. There is a need sometimes to stop and think A.: With regard to the second, ECOWAS undoubtedly has conabout where we are and where we go from here.

tributed to bridging the ignorance gap between the two groups, Igno-To name twn specifics, on the free movement of people protocol, rance breeds fear and prejudice. ECOWAS in the past five years has provided a forum for contact we will assess how the program is heing implemented; on the telecommunications program, we can report that we had a donors between English-speaking and French-speaking countries, and that has contributed to creating the feeling of belonging to one re-gion. On the first issue, I can tell conference a few days ago and that the program is now well on its way since we have found the financing for it. This will be the community's you that ECOWAS played a role. first major project.

I would not boast, of course, Q .: On the free movement of that we descrve the sole credit, but people, is there not some contro-versy and opposition developing? A.: Anyone who reads the proto-I can definitely say that ECOWAS played a role, I do not want to say more than that. Reconciliation among countries was a must be-

col will see that it was very cauhy-stage program. The protocol it-self is not a problem. The question is how it is being implemented. In fore progress could be made. As you know, one year later a very difficult protocol on the free movement of people was signed. This would never have been possible fact, we made sure that there were specific directives for member countries to follow so that that

protocol, which is the first import-

After all, the aim of bringing into being such an organization is to create a spirit of oneness, of sol-idarity, of recognizing a need to work together. The reason for wanting that is the desire to develop together. But results will only come if the right atmosphere is present. If there is no peace, there is no economic development. My assessment is that a substantial improvement has taken place in West Africa over the past five years in the terms of relationships between countries. In January, 1977, when I assumed office, some of the West African countries were not even talking to each other. Today, that

Q: The beginning was a trou-hled time within ECOWAS. There was a conflict between the Fund and the Secretariat, between Romeo Horton and yourself that took two and a half years to re-solve. Was this a serious handicap to the beginning of ECOWAS? A.: Not from my point of view.

It would have been a handicap if it had prevented the ECOWAS pro-grams from moving on schedule. But that was not the case. While is what we did. The proposals we made to the Council of Ministers OL Q .: What is the main purpose of in May, 1979, laid down the priority work program for the communithis year's Council of Ministers' and summit meeting? **R** ICHARD SYNGE is West Africa editor of the London-based Africa Economic Digest.

ant measure to affect ECOWAS citizens, should not produce unexpected prohlems. But time is need-We anticipated that there would be some uncasiness at the beginning about the free movement of people, but that is not the fault of the protocol. The member countries have to find their feet in this new situation. It is the first regional decision they have had to imple-ment. It is the first that affects the ordinary citizen. There will be many more.

Q.: In the last year ECOWAS has experienced a coup in one of its states, Liberia. Is the organizannn equipped to deal with sudden and violent change in one of its members?

A.: 1 think it has been proved that this does not disrupt ECOWAS at all. Since ECOWAS started, governments have changed many times, but that has never affected the ECOWAS momentum.

# Attractions That Travel Agents Dream of

WEST AFRICA has an abun-W dance of attractions that travel agents dream of: tropical beaches, lagoons and islands, game parks and mountain scenery, han-dicrafts and traditional music and dance. There is also the unique concentration of historical sites connected with the slave trade, in-

cluding ceric forts and dungeons. But West Africa is not yet a prime tourist destination, partly because of the severe economic hardships of many West African states and partly because the tourist industry has not demonstrated that it can become a significant economic or social benefit to the region as a whole.

Only Senegal and the lvory Coast, the two countries that have kept the closest ties with France, have retained the European coloni-al tradition, with spotless hotels and efficient travel agencies able to book car rentals or weekend excorsions and to provide game viewing, deep-sea fishing, golf, ten-nis and hante cuisine.

Other countries had different priorities after independence in the 1960s and tourism only began to develop again in the 1970s. Gambia, for example, has had an in-crease of package tours from Scandinavia, with a subsequent boost from the United States following the publication of Alex Haley's "Roots" and its serialization on television

Togo, meanwhile, has built ultramodern hotels along its short but attractive shoreline and is able

cilities, but it has difficulty attract-

ing cheap package tours because of high air travel costs. In Upper Volta, a French air charter firm, Le Point de Mulhouse, has in recent weeks introduced the most competitive air fares yet in French-speaking Africa. The French-managed Air Afrique has been prompted by this development into considering more concessionary rates to some

countries. Ghana, perhaps more richly en-dowed with historical and ultural attractions than any other country in the region, has been unable for reasons of political and economic

i.e. 

to provide business conference fa-, nized tourist industry although it difficulties and growing poverty is remains popular with those who know it well.

West Africans are very sensitive to manifestations of the search for "exolucism" among Western travel agencies and travelers, but few West African entrepreneurs have tackled the problem of construct-ing a more locally based and authentic industry. The need for a change in the

traditional approaches to the tour-ist industry in West Africa is felt most in the areas of "sophisticated" tourism, particularly in Senegal, where the irony of ever-more ambitious botel complexes in an

not lost on the average Senegalese. In the lvory Coast, there is a more secure basis for expensive

and smoothly running tourist in-dustry. Foreigners in West Africa working for short periods on construction or other projects look to the lvorian capital and coastline for the creature comforts that they miss. But the lvory Coast tourist industry, largely managed hy for-eigners, has been unable to guaran-

ter the low prices required by the package industry from Europe. With the growth of a wealthy

class of Nigerians, inter-African luxury tourism has also begun. Ni-gerians are taking holidays, often mixed with business, m West Africa, gravitating to the existing facilities in the Ivory Coast and stimulating the development of holiday hotels both in their own country and in neighboring Benin and

Togo. The international hotel groups have concentrated their construchave concentrated their construc-tion programs in West Africa on Nigeria. The Lagos state govern-ment announced last month that 14 international class hotels would be built around the Nigerian capi-

Although West Africa is unlikely to become a mass package-tour destination, except in a few spots, it will steadily acquire the facilities for modern business travel to match the growth of inter-ECOWAS trade and cultural ex-

- RICHARD SYNGE

#### 4. WHAT FINANCIAL RESOURCES ARE BEING MADE AVAILABLE TO UPPER VOLTA BY THE COOPERATION, COMPENSATION AND DEVELOPMENT FUND, AND WHAT PROJECTS HAVE **ALREADY BEEN COMPLETED?**

The ECOWAS fund is an institution whose structures are not yet fully operational. So it is hardly surprising that its activity is still limited. The Fund is an instrument that is an excellent example of cooperation between the member states. At the appropriate moment, Upper Volta will approach it with a view to implementing certain of the country's projects.

#### 5. HOW ARE YOUR RELATIONS WITH THE OTHER MEMBER STATES OF ECOWAS?

Even before ECOWAS was formed, Upper Volta had always been on excellent terms with the other countries. Our dealings with them essentially concern commercial exchanges and communications. ECOWAS offers an especially favorable context for increasing the cooperation between Upper Volta and the other member states of the Community.

#### 6. ONE OF THE SPECIFIC OBJECTIVES OF THE COMMUNITY IS TO PROMOTE COOPERATION BETWEEN THE WEST-AFRICAN STATES. IN YOUR VIEW, MR. PRESIDENT, HOW FAR HAS ECOWAS GONE TOWARD ACHIEVING THIS OBJECTIVE, AND FOR WHAT REASONS?

The ultimate aim of the ECOWAS Treaty is integration between the member states. Such integration must be achieved in successive stages.

To arrive at this end, the member states must transcend their present narrow nationalism and realise that the success of ECOWAS depends on the political will of each one. All the members must be conscious that cooperation is a deliberate option that also implies constraints. One of the achievements of ECOWAS that I like to cite is the agreement on free circulation of persons and goods among the member states. This agreement is one of the essential elements for integration. That is why all the member states must implement all its relevant provisions.

After the summit meeting of ECOWAS in Freetown on May 28 and 29, the Community must move on to a new stage in the demolition of tariff barriers. ECOWAS is thus pursuing its objectives, bearing in mind the difficulties with which its members are confronted. For, the international economic environment is at present hardly favorable for accelerated integration. Our states are meeting with difficulties of all kinds, and so they must act with prudence and circumspection. ECOWAS is one of the links in a chain that will enable Africa to achieve by the year 2,000 its integration in the Common Market that is so ardently desired.

New Interest

#### By Bayo Rotibi

WITH THE lifting of tariff barriers on ECOWAS-origin industrial products, Nigeria is moving to promote its goods and services in the subregion.

Despite the considerably diminished revenues from crude oil expected this year because of the glut in the world oil market, Nigerian industry will not be starved for funds

The government doubled the outlay for manufacturing in the 1981-1985 plan from the previous plan to 8.2 billion nairas and announced bold incentives for foreign investors, especially in the agribusiness field, where foreign investors can now hold controlling interests.

The aim is to create jobs during the 1981-1985 development plan and to establish a durable alternative to crude oil as a major foreign exchange earner. "We must now use our oil revenues to expand and modernize our industry and assure its competitiveness in Africa and beyond," an official said in Lagos.

#### Trade Mission

Halfway into the 1981 fiscal year, this vision seems to be near reality. The long search for foreign outlets is at last at an end. A major trade mission is due to visit five ECOWAS countries in August and September under the auspices of the Nigerian Export Promotion Council (NEPC), the various chambers of commerce and indus-

try and the Nigerian Export Mer-chants Association. genia estimates, for example, that the country is losiog up to \$250 Representatives of the 45 Niger- million a year from smuggling. ian companies will visit Togo, Ghana, the lvory Coast, Senegal and Gambia to promote such greatest single threat to industry and inhibits efforts for the compet-

Other companies have either gone on short weeks or face ban-

#### **Textile Industry**

Nigeria's total trade with its 15 ECOWAS partners fell by 4.8 percent from 1979 to \$302.5 million in August, 1980, due largely to the decline in output during the 1978-1979 recession. But the Ivory Coast and Senegal were the princi-pal markets for these exports, and officials in Lagos are confident that Nigerian non-oil exports would increase with the much-improved economic situation and the opportunity now offered by the new ECOWAS industrial protocol.

United States, Europe and else-where in Africa. solution for the Sahel's chronic food problems, but studies indicate that both the initial costs and the prohibitively high maintenance the promotively mgn mannemance expenses of large irrigated projects do not augur well for widespread use in the poor Sahel countries. Small project like Kati's, although expensive to build, may be on a scale that peasants can afford to maintain, development experts said

#### S2 Billion

Of almost \$2 billion that has een poured into the Sahel for food development projects since 1975, 10 percent went into irriga-tion projects. During the same period, however, the number of acres under irrigation in the Sahel fell from a high of 574,000 acres to 560,000.

Solution. The figures indicate that the number of new irrigation projects is just barely ahead of the pace at which other recently completed projects are being abandoned be-cause neither the peasants nor their governments have the money to maintain them. The costs of these projects, particularly for the landlocked countries such as Mali. landlocked countries such as Mali, continue in rise while the rate of completion is frustratingly slow. Of 91,000 acres that were planned to be completely irrigated in Mali by now, for example, 17 percent, or 15,000 acres, have been com-

pleted The Kati project was taken on by Africare, a Washington-based nonprofit development organiza-

uon. Funded by the U.S. Agency for International Develoment, private foundations, churches, business corporations and wealthy individuals, Africare administers moderatesized projects that African govern-ments have planned but do not have the funds to carry out, ac-cording to the organization's direc-tor io Mali, Richard J. Benn.

'Problems Don't Change'

Mr. Benn, 32, came to Mali as Africare's director in 1975 after spending four years as a Peace Corps volunteer in neighboring

Corps volunteer in neighboring Niger, working as a well-digger and English teacher. "I guess I've been exposed to all the difficulties and problems that get in the way of development ef-forts," he said. "The problems don't change, they just repeat themselves and you just work at overcoming them," he added.

In early 1976, Mr. Benn went to the Malian Ministry of Rural De-velopment, where officials suggest-ed that Africare take on the Kati project. After discussions with Kati's farming cooperative and the village's mayor. Mr. Benn submit-ted a ptoposal together with the ted a proposal, together with the ministry's original \$8,000 cost esti-mate, to Africare's Washington

secutive month of annualized inreases of less than 10 percent as neasured by the Consumer Price Index.

Deputy White House Press Sec-Deputy white House Fress Sec-retary Larry Speakes said that "June's results, together with the GNP (gross national product) in-dices, emphasize the overall moderation in inflationary pres-sures, which are bringing a measure of welcome relief to American consumers."

The improvement from the 12.4 percent annual rate registered for all of last year has been the result largely of lower-than-expected en-ergy and food-prices, and both in-creased only moderately again in June

But a big increase in housing costs, which had begun showing up

### Inflation of 3% Seen for Japan

United Press Int TOKYO - Japan's chief economic planner indicated Thursday that consumer prices would not rise more than 3 percent in the current fiscal year. An official forecast by govern-

ment economists has put the infla-tion rate for the fiscal year beginning in April at 5.5 percent. But Toshio Komoto, director-general of the government's economic planning agency, told a group of businessmen that barring unexpected price increases of seasonal goods or a sharp depreciation of the yen, the inflation rate would be contained within the 3 percent

ievel. He up a He added that Japan may chalk up a surplus in the current accounts in the current fiscal year if exports continue to maintain their present brisk pace. 

# in May, came on strong in June, according to the Department of Labor report.

The housing component of the index rose 1.1 percent in June, ac-counting for about three-fourths of the overall inflation increase, the report said. Home-ownership costs rose even

more — about 1.5 percent — but that increase was softened in the overall housing figure by a 0.4 percent rise in rental costs, the smallest in more than a year.

All the figures are adjusted for seasonal variations in prices.

The CPI is the most widely publicized inflation index, but it has been criticized for the heavy weight it gives to housing costs, particularly mortgage costs. Although mortgage rates have clearly risen rapidly in recent months, reaching an average of 16.75 per-cent in early June, critics point out that relatively few Americans are huying houses in any one month. Therefore, they say, housing costs should not he allowed to pro-

duce as big a swing in the CPI as they did in June.

Single-Digit Increases Inflation increases as measured by the CPI have ranged between 0.4 percent and 0.7 percent a month since March — well below double-digit rates of the past two

Chrysler, Union in Profit-Sharing Accord In addition, the Commerce Department reported Wednesday that the gross national product implicit price deflator - a separate inflation index - dropped from 9.8 percent in the first quarter of this year to 6 percent in the April-June quarter.

The administration and most private economists are now forecasting that consumer prices will rise less than 10 percent this year. A separate Labor Department report accompanying the CPI said that real spendable earnings for a typical U.S. wage-earner declined percent in June.

That figure describes average weekly earnings, after taxes and af-ter adjusting for inflation and seasonal variations, for a married worker with three dependents.

### Brascan Venture Seeks Noranda United Press Int

TORONTO - Brascan and Caisse de Depoi et Placement du Québec announced Thursday that they were pooling their holdings in Noranda Mines and will seek representation on the Noranda board.

The new company, Brascade Resources, will have an initial equity of 1.6 billion Canadian dol-lars (\$1.32 billion).

Brascan President J. Trevor Eyton and Caisse Chairman Jean Campeau announced also Bras-cade plans to purchase 20 million Noranda com-mon shares at 36.25 Canadian dollars each and 1.8 million convertible preferred shares at 109

Canidian dollars each. Brascan and Caisse together hold 24.3 million common shares in Noranda, about 28 percent which will be pooled in the new company. With the additional share purchases, Brascade would hold about 39.2 percent of each of Noranda's

#### common shares and convertible preferred shares. The two companies said they have "also authorized the investment of a further \$600 million cash in the equity of Brascade ... and are presently arranging bank lines with Canadian chartered banks aggregating more than \$1 billion."

#### **Ownership Breakd**

The new company will initially be 70 percent indirectly-owned by Brascan and 30 percent by Caisse de Depot and will participate in Canadian resource development, Mr. Eyton said. He said the proposed purchase price was fair

"given current depressed metal markets and mate-rially reduced earnings prospects for Noranda in The purchase offer for Noranda stock was the same as that paid by Brascan for 5.5 million No-

randa common shares June 4, representing a premium of 60 percent over book value, he said, and a 90 percent premium over the price that Noranda treasury shares were issued to its subsidiar-

Both Brascan and Caisse de Depot have been concerned "about the approximate 50 percent di-lution [in Noranda] they and other shareholders have suffered during the last 20 months," Mr. Ey-100 said.

Brascan, a giant holding company with \$900 million in cash and securities after selling its Bra-zilian power interests, is controlled by Edward and Peter Bronfman.

It has been seeking to expand its stake in No-randa since buying in 1979 a 16-percent interest in Noranda, one of Canada's 20 largest companies with extensive copper, potash and other mining and natural resources holdings.

#### Earlier Rebuff

Bui Brascan's demand at that time for representation on the board as the largest single sharebolder was rejected by Noranda Chairman Alfred Powis hy a complex reorganization in which Zinor Holdings, owned primarily by five Noranda affili-ates, was made Noranda's largest single shareholder.

Brascan and Caisse said they bope that as the two largest shareholders in Noranda, they will be given Noranda board representation. Mr. Eyton said Brascan had intended originally to hold a 20 percent interest in Noranda and two places on Noranda's board

"Brascade Resources would seek to nominate to an expanded board the number of directors proportionate to its percentage holding in Noran-da," Mr. Eyton said.

# Seagram Boosts Bid \$7 to \$92 **In Battle for Conoco Control**

From Agency Dispatches NEW YORK — Seagram raised its offer Thursday in the heated bidding war for Coneco to \$92 a share from \$85 a share for 51 percent - and possibly more - of the

company's outstanding shares. The announcement by Joseph E. Seagram & Sons, U.S. subsidiary of the Canadian liquor concern, came a day after Mobil said it may sweeten its \$90-a-share offer for 43.5 million, or 50 percent, of Conoco's shares "so that it would be at least as high per share" as the \$95-a-share cash portion of the of-fer hy Du Popi offer, the third floating base rate, the spokesman said. Seagram, in its statement, noted that Du Pont will not purchase any competitor in the most hotly con-tested and richest merger battle in corporate history.

shares before Aug. 17 and Mobil Mobil has offered \$90 a share in has said it will not purchase shares cash for 50 percent of Conoco until various antitrust enforcement stock and an equally valued stock swap for the rest. Du Pont has bid agencies have completed their re-views of its proposal. As well, both Mobil's and Du Pont's offers are \$95 a share in cash for 40 percent of Conoco stock and a lesser-val-ued stock swap of 1.7 Du Pont shares for each of the remaining conditional upon at least half of Conoco's shares being tendered. right 10 purchase additional shares

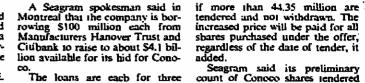

Conoco shares. Conoco has fiercely resisted Seagram's offer, which now totals around \$4.08 hillion. up from \$3.77 billion. and a Conoco spokesman, reached at the company's Stamford. Conn., headquarters, declined comment on Seagram's latest move. Conoco directors are on record as favoring the offer Du Pont, Conoco sued Wednesday to en-

join Mohil's hid on the grounds that Mohil, the second-largest U.S. oil company, would violate U.S. annitrust laws if it merged with Conoco, the ninth largest,

In return Mobil announced Thursday that it is suing Conoco for access to the company's shareholders list so that it can inform Conoco bolders about its offer. Mobil said it asked for the list Tuesday and Wednesday but was rebuffed by Conoco. Under Delaware law, a shareholder has the right to inspect a company's stockolder list. Mobil owns 735.800 Conoco shares,

Seagram also extended to Aug. 5 from Friday the deadline for ac-cepting its offer for 44.35 million Conoco common shares. But it did not change the July 31 deadline for Conoco shareholder to withалу draw shares tendered to Seagram under the offer.

Seagram, which said it has borrowed an additional \$200 million to back its higher offer, added it is prepared to begin payment for sbares immediately following the July 31 expiration of the withdrawal period.

increased price will be paid for all sbares purchased under the offer, regardless of the date of tender, it added. Seagram said its preliminary count of Conoco shares rendered through Wednesday is not com-

years with the one from Manufac-turers Hanover bearing quarterly plete but the number of shares tendered, although "substantial, is less than 44.35 million. interest equal to the greater of the bank's prime rate or 3 points above the London interbank of-If any tendered shares are withfered rate. The Citibank loan bears quarterly interest at the hank's

drawn they will be treated as not having been tendered prior to Wednesday and will lose the benefit of early tender.

Seagram said if the number of shares validly tendered between Wednesday and through Aug. 1-the second period — exceeds the number of shares to be purchased by Seagram after deducting the number of validly tendered shares through Wednesday and not withdrawn, then the shares tendered during the second period and not withdrawn will be purchased on a pro rata basis.

**Prices Gain on Wall Street** As Traders Seek Bargains

From Agency Dupatches NEW YORK — Prices on the New York Stock Exchange, with with the Federal Reserve Board's light money policy. Mr. Sprinkel acknowledged, in the help of some bargain hunting. hroke out of a three-session slump Thursday despite continued high

Seagram said it reserved the

interest rates. The Dow Jones industrial averge, which plunged 9.80 points Wednesday to a seven-month low, was ahead 3,90 points to 928,56 an hour before the close. It had been down more than a point at midday. The Dow average Wednesday hit its lowest level since it finished at 918.09 on Dec. 16, 1980. Declines led advances, 786-524.

among the 1.875 issues traded. The five-hour NYSE volume was 41.79 million shares, compared with 47.5 million traded during the corresponding period Wednesday,

Analysts said they expected the market to experience some bargain hunting because it has fallen so sharply in the past five weeks. Also, some traders were replacing

borrowed sbares they sold earlier. Treasury Undersecretary Beryl Sprinkel said Thursday that res-tricting money supply growth is absolutely necessary to eliminate inflation and that the Reagan ad-ministration is "quite pleased"

remarks to the House Banking Comittee, that tight money is causing some economic bardship, but said any casing would hring

only temporary relief. Mr. Sprinkel's comments helped the dollar close higher in London. The U.S. currency strengthened to 2.4445 Deutsche marks from 24415 DM Wednesday, The British pound closed weaker at \$1,8565, compared with \$1.8600 Wednesday.

Most of the action on the NYSE floor centered arounnd some of the biggest takeover situations in U.S. history. The major targets were Conoco and Colt Industries.

Colt Industries, trading for the first time since Monday, was sharply higher, closing up 21% at 84<sup>3</sup>4. Penn Central has agreed to buy the company for the equivalent of \$100 a share.

Conoco was the most actively traded stock, with volume of more than 1.8 million shares, and closed up 3<sup>3</sup>/<sub>4</sub> to 87<sup>1</sup>/<sub>4</sub>, Joseph Seagram & Song raised its bid for 51 percent of Conoco's stock to \$92 a share from \$85.

# **BUSINESS NEWS BRIEFS**

#### Ford Motor Posts 2d Quarter Profit The Associated Press

WASHINGTON - Ford Motor reported a profit of \$60 million Thursday for the year's second quarter, a sharp turnaround from a loss of \$468 million in the same period last year. Chairman Philip Caldwell said the profit reflected "substantial reduc-

Ford, the second-largest U.S. automaker, earned \$31 million before taxes in the second quarter, compared with a \$971 million loss before " ..... taxes last year.

Ford said it finds the level of industry sales disappointing, particularly in the United States, but added that it sold more small cars in the country during the 1981 model year than any other manufacturer. It said its Escort, introduced last October, is the best selling line in America.

#### Matra, Tandy to Form Subsidiary in France Reuters

The Associated Press DETROIT - Chrysler and the United Auto Workers union have

agreed on a profit-sharing program for UAW members employed by the No. 3 U.S. automaker, the un-"goodwill bonus" in October.

ion announced Thursday. UAW Vice President Marc Stepp, who beads the union's Chrysler department, said hopes the plan will be in effect by next year. The agreement runs through the end of 1985. The plan still must be approved by the fed-eral Chrysler Loan Guarantee

Board. Chrysler and the UAW agreed in January to negotiate a profitsharing plan in exchange for wage concessions granted by the union,

The concessions were necessary to win approval from the loan board for the latest round of \$400 million in federally guaranteed loans.

On Wednesday, Chrysler said it posted a \$12 million profit in the second quarter, its first quarterly profit since late 1978. The amount of money available

to workers under the plan is keyed to Chrysler's net worth. For instance, if Chrysler's net worth was \$1 billion and the company earned

\$300 million in profits, about \$30 million of those profits would be distributed among about 70.000 UAW members, Stepp said.

The workers would have the option of accepting Chrysler stock or credit toward the purchase of a Chrysler vehicle. If the worker chose a purchase credit, he would

receive \$1.50 for every \$1 in stock bates of \$500 to \$1,000 on he would have received under the Chrysler cars and trucks - also stock option. In addition to the profit-sharing plan, the company agreed to pay each eligible UAW member a \$50

A drawing for more than 3,000 utives and engineers, certificates — including 1,000 re- chairman Lee A. lacocca.

will be arranged, Mr. Stepp said. He blasted Chrysler for putting the company and the union "back into an adversarial posture" by

granting pay raises to certain executives and engineers, including

Japan Agrees to Expand **Purchases of Mexican Oil** 

tracts.

The Associated Press TOKYO - Japanese oil companies have agreed to continue buy-ing 100,000 barrels of oil daily from Mexico and to eventually take up to 200,000 additional harrels a day, it was announced Thursday.

Japan's Mexican Petroleum Import Co. said it will start buying more oil after working out a pur-chase schedule with Mexico "as soon as possible," but did not necessarily commit itself to increasing Mexican crude-oil purchases to 300,000 barrels a day, as Mexico has proposed.

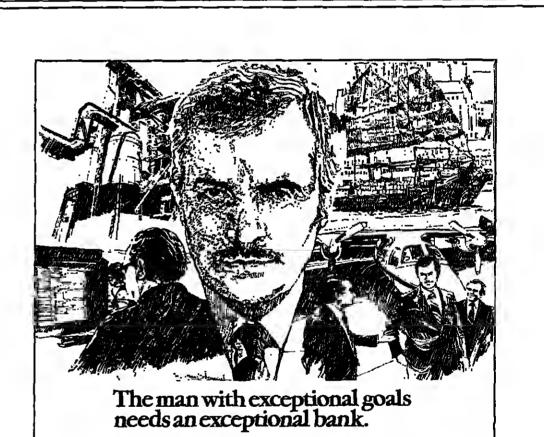

In the joint communiqué, Petróleos Mexicanos also apnounced that it will set oil prices in proportion to the amount of light and heavy crudes in the "mix" it sells. Mexican Petroleum Import apparently will be allowed more choice in the kind of crude it buys.

an important concession to oil refiners since many have been asking for a lighter mix.

The change in its pricing system also may provide Pemex a discreet way to hack down from the \$2-aharrel oil price increase it has been

glut and slack demand. Mexico cut its average price of oil for export by \$4 a barrel June 1, which caused a political uproar at home. When it tried to add \$2 back to the price, several foreign

# oil companies suspended their con-

# pushing despite a worldwide oil

PARIS — Matra said Thursday it agreed with Tandy to set up a subsidiary in France in which Matra will bold at 51-percent stake. It will manufacture the TRS 80 Model Three microcomputers, which

Tandy will sell in EEC countries, and develop other mass electronics products notably in the telecommunications field. Matra gave no financial details of the agreement, which needs approval of the authorities in both countries.

# Japan to Cut Off Funds for Iranian Project

TOKYO - Japanese investors in a \$3.2 billion petrochemical complex in Iran will send a delegation to Tehran next week to inform oil officials there that Japan will spend no more on the nearly completed project, a Japanese official said Thursday. Japan

The delegation from Mitsui, chief developer in the project, will carry the message that Iran must bear all future costs for the stalled Bandar Khomeini complex in southern Iran, said a spokesman for Iran Chemical Development, Mitsui's investment wing.

He said the Japanese side is prepared to continue selling equipment and offering technological aid to the project but does not consider il commercially feasible to invest further in the much-delayed complex. Profits ..... Per Share

#### Mitsui Sees Better Results Next Year

TOKYO - Mitsui and Co. said Thursday its consolidated net income in the business year ending next March will rise to about 28 billion year (\$120.8 million) from 18.26 billion last year on sales of about 16 trillion yen, up from 14.93 trillion.

A Mitsui spokesman said this was a rough estimate with much de-pending on the yen-dollar exchange rate. Mitsui earlier in the day report-ed that the 18.26 billion yen was a 35.7 percent drop in net income. The company said, however, that the sales figure was up 11 percent from 13.44 trillion last year.

## **CSR Proves New Australian Coal Reserves**

ADELAIDE, Australia - CSR has established the existence of substantial brown coal deposits in Mannum, about 100 kilometers (62 miles) east of here, General Manager Gordon Jackson said Thursday.

He said drilling has so far has outlined 212 million metric tons of measured and indicated reserves, and a further significant rise in reserves

is expected from the 1981 drilling program. Like other South Australian brown coals, these deposits bave a high moisture and sulphur content although the sodium content is appreciably lower, he added.

# For the man with exceptional goals, foreign exchange by TDB.

TDB trading desks, from New York to London and Geneva to Hong Kong, are equipped to provide the international businessman with roundthe-clock foreign exchange service-a major advantage in today's fastmoving currency markets.

Moreover, the foteign exchange specialists in each of our banks see ro it that orders are executed promptly. We have had long experience at handling exchange transactions of any size-not only in the principal trading currencies, but many of the less familiar ones as well.

We at TDB serve international

businessmen in other important ways, roo. In addition to foreign exchange. we're considered specialists in trade financing, banknotes, deposit accounts and precious metals.

Serving our clients well has helped us grow uncommonly fast. Today, we're big enough to provide most of the sophisticated facilities of the international banking giants-but lean enough not to keep you waiting for decisions.

As part of the Trade Development Bank Holding Group, we're ready to serve you in most of the world's financial centers.

TDB Holding Group: US\$ 9.7 billion in assets; US\$ 808 million in capital and loan funds employed as of December 31, 1980.

Group banks: Geneva, London. Paris, Luxembourg, New York, (Republic National Bank of New York) Athens, Chiasso, Hong Kong, Los Angeles, Miami, Monte Carlo, Montevideo, Nassau, Panama Ciry, Santiago de Chile. Representative offices: Beirut. Buenos Aires, Caracas, Frankfurt, Mexico City, Rio de Janeiro, São Paulo, Tokyo.

TDB's large staff of specialists handle a full range of foreign exchange transactions for clients, in all trading currencies.

### BOOKS.

SHOWING OFF IN AMERICA From Conspicuous Consumption to Parody Display By John Brooks. 296 pp. \$12.95. Atlantic-Little, Brown, 34 Beacon St., Boston, Mass. 02106. Reviewed by Christopher Lehmann-Haupt .

stein Vehlen whether he was the au-thor of "The Theory of the Leisure Class," he replied, "If I am, it has been a long time ago, and I promise never to do it again.

Of course he never did, which is particularly unsurprising when you consider the number of forgettable books he was busy writing late in his career, one or two of them shading the conclusions of his earlier classic. But what does come as a surprise, especially to Brooks, is that no one eise has tried to do it again. Or, as Brooks puts it in the first chapter of "Show-ing Off in America," "seldom if ever have his categorical comments on spe-cific American phenomena like clothing styles, cating and drinking habits, preferences of taste, lawns, sporting events and the like been measured against current American customs and attitudes as to the same things. with an eye to discovering what has changed since 1899 and why."

And there is, after all, so very much to comment upon in the United States these days, according to Brooks, who is on the staff of The New Yorker and is the author of a dozen books. There's the craze for designer jeans, and there's the willingness of some to pay \$5 for a glass of Perrier with a wedge of lime. There's the sniffing of cocaine among the rich and celebrat ed, and the preference for thinness over fainess unto anorexia nervosa. There's the monthly poker game and the trip to Brazil for cosmetic surgery. There's Jerry Brown and George Ames Plimpton. There's jogging. How to account for all this in the framework of Thorstein Veblen's the-

ory? It is Brooks' basic notion that the United States has passed far beyond the times when simple "conspicuous consumption" was impressive or acceptable. Gone are the days of the longer yacht or the larger beach cot-tage in Newport. One has to disguise one's "predatory invidiousness" with a sense or irony or a measure of styl-

ish intricacy. So instead of getting fat, people in the United States strive to get thin, even at the risk of starving to death.

#### NEW RULES Searching for Self-Fulfillment in a World Turned Upside Down

By Daniel Yankelovich. Illustrated with charts. 278 pp: \$15.95. Random House, 201 E. 50th SL, New York 10022."

To reduce the intriguing thesis of and deeper personal relationships," this book to a very small nut-shell: It is Daniel Yankelovich's judg-instrumental values for sacred-expresthis book to a very small nut-shell: It is Daniel Yankelovich's judg-ment of the last decade or so that the people of the United States zigged just about the time the U.S. economy zagged. "create-a civilization that is economi-Basing his analysis mainly on the

findings of his polling service, Yank-elovich, Skelly & White, as well as on cally viable; politically stable, socio-logically integrated, and also open to the full promise of individual life; in a series of "life-history interviews," Yankelovich concludes that the era of other words, what seekers of self-fulfillment want." prosperity that followed World War II wrought powerful changes in the pyschology of Americans. Lulled by discuchanted with the old emblems of success and the self-sacrificing "rat race" it took to achieve them. An acis now in the making? Not really. For one thing, the book is so ridden with sociological jargon that it is hard to

take its message seriously. What with tive minority, constituting 17 percent its incessant reiteration of the of the working population, even took overused and irritating expression concrete if somewhat confused steps toward redefining its values and putting more emphasis on gratifying the "self," whatever that may be, instead of sacrificing it. Meanwhile, a less-visible majority, making up nearly two-thirds of the population, or about 100 million Americans, while retaining many traditional values, was developing dramatically more skeptical attitudes toward the ethic of self-sacrifice. The upshot was a change in values and goals that was far more profound than the highly visible but comparatively superficial upheavals of the 50s, and that was also very different inasmuch as the counterculture was seeking less while the new majority of Americans was asking for more. to it than bad philosophy, it isn't going to be so easy to escape. Finally, Yankelovich's concluding hopefulness seems somewhat hollow. It isn't just that his prose has the ring of a prep-school graduation speech. it's also that his evidence seems so scanty, based as it seems to be on what the anthor calls the "Search for Community to call the "Search for Then suddenly, the energy crisis brought the era of prosperity to an end in 1973, leaving millions of Amer-icans in a solipsistic quandary. They had their hierarchy of needs, and they had their ideal of a fulfilled self, what-ever that might be. But neither needs nor self-fulfillment was apt to pay the bills. So Americans faced — and still face — which took the creating Community social trend, whose staface - disaster, which took the speciftus my firm measures each year"; on the desires of people whose idea of a "creative" life is to be more involved ic form of rampant inflation. Still, all is not lost, so far as Yankin yogs and transcendental medita-tion, and to avoid junk foods and eat clovich can see. For there were also hopeful signs to be gleaned from his survey data. Among other self-satis-factions that Americans appear to be yoguri; and on the rather isolated case of automobile-assemblyline workers scarching for now are, first, "closer

CCORDING to John Brooks, when someone once asked Thor-n Vehlen whether he was the auscream at tennis line judges who make questionable calls. Instead of dissipating themselves in drink, as affluent people used to do to waste themselves conspicuously, they indulge a new form of drinking display called nondrinking.

Is this a parlor game that Brooks is playing? Or is he seriously trying to show us what makes things work these days in the United States? He seems to be serious. Although his tone is light and playful and though he sometimes appears a little too facile in adapting Veblen's theories, he wants to pay homage to the eccentric sociologist and to revise and update Veblen's book.

The problem is that "The Theory of the Leisure Class," as Brooks himself points out, "has the classic quality of a work of genius — that of creating its own world." By this I suppose he means that no matter whether its ideas are wholly logical, they seem to be important and true because they are part of a unique world. Brooks' book, in contrast, does not create its own world. While witry, entertaining and gracefully written, it is entirely de-rived from its far greater model. Thus its ideas, true or not, seem diminished.

Yet in a perverse sort of way, this very diministion may serve to honor ingoliating sessi ingoliatingoliating sessi ingoliating sessi ingoliating sessi ingo Veblen. The most revealing anecdote Brooks tells on his subject is the one about how Veblen once destroyed a cabin that belonged to him because he thought some absentee owner had cheated him out of it. Subsequently, it turned out that he was wrong about having been cheated, so that the ab-sentee owner who had despoiled it was no one but Thorstein Veblen. As Brooks concludes the story: "The peaceable savage, thinking he was holding his own against predatory in-vidiousness, had become a parody of predatory invidiousness himself."

Perhaps Brooks, by trivializing Veblen's ideas, has shown that Veblen is rich enough in ideas to afford their waste. Perhaps he is really updating Veblen by becoming a parody of him.

CHICAGO COPENHAGEI

Solution to Previous Puzzle

### BRIDGE

A GGRESSIVE actions by East and South carried both partnerships quickly to the four-level. West chose to defend four spades. Any red-auti-lead would have been effective, but West selected the club ace, hoping for a later ruff. But instead of underleading the heart ace at the second trick. on the assumption that East held the heart king, or shifting to a diamond, West made the fatal error of cashing the heart ace.

The next lead from West, a diamond, came too late. South won with the acc, cashed the spade acc and played clubs. He was rewarded when West was unable to null. East nulled the fourth club lead with the spade ten, and South overruffed. A heart was ruffed in dummy - possible because the heart ace had been cashed - and another club was led. The losing diamond was discarded from the closed hand, and East could score the spade king when he pleased, taking the third and last trick for the defense.

tions Committee had met secretly should honor his presence and his and face to face for 11/2 hours, at ability. Donovan's request.

It marked the first time in the strike that players and owners themselves had met to bargain. Management is usually represent-ed by PRC director Raymond Grebey. National League President Chub Feeney, American League

President Lee MacPhail and lawyers for the leagues and the com-

The mediator and spokesme for the PRC and the Major League Players Association refused to comment on what went on at the secret session, observing the black-ont imposed Monday at Donovan's urging.

But Wednesday night, Doug De-Cinces, the American League player representative, said the players would end the news hlackout Thursday with the planned news conference.

"I would love to tell you" what has taken place since the talks moved to Washington from New York Monday, DeCinces said in a

televison interview Wednes lay night. But DeCinces said that Donovan felt the blackout was im-portant to the progress of the talks. "He feels it is totally occessary. and that as long as he's involved the issues being discussed are not to be discussed publicly. I feel we

Wednesday's surprise bargaining session, at the Office of sonnel Management, came less than an hour after Moffett had

told reporters the two sides spent five hours in separate meetings, oever getting together.

Moffett's announcement also was made at the hour when he had earlier told reporters that the two sides were due 10 return 10 the Mediation and Conciliation headquarters, although ooi necessarily for hargaining. Moffett and Broff

were the only ones who returned. Key Dates

The strike was 42 days old Thursday, having wiped out 499 games or 24 percent of the season, and two key dates were rapidly ap-Proaching — Aug. 1 and Aug. 5. Aug. 1 has been mentiooed by many in baseball as the last possible date for a meaningful season to resume, considering time needed for the players to get back into

"It has to be somewhere around Aug. 1," said Harding Peterson, the Pittsburgh Pirates' executive vice preident. "You can't go too much less than 100 games." Baltimore, for example, had played 54 games before the strike started June 12. It would have to resume play Aug. 15 and go

that ended Sunday in Paris.

Playing Dumb

through the rest of its regular-season schedule to reach the 100-game mark. We have to get going ometime in early August, said Oriole outfielder Ken Singleton "For sure, this will be the year of the asterisk."

Aug. 5 is the last day on which the owners will receive \$100,000 per-game payments from a \$50 million strike insurance fund.

Meanwhile, another player voiced dissatisfaction with the way the strike was going. "The whole thing is a circus." Los Angeles Dodgers second baseman Davey Lopes said. "Each side has han-dled it poorly. What is the players" executive board doing in negotia-tions? I don't think they have credentials to be in a labor meeting,

#### Backgrounds

"Do Doug DeCinces and Boh Boone [the National League player representative] bave legal back-grounds?" Lopes asked. "I didn't see any postal clerks goiog into their negotiations."

The key issue in the strike is free agent compensation. The owners want a professional player as compensation for a team losing a topquality free agent, and bave pro-posed direct compensation from the signing team. The players have proposed compensation from a talent pool, with all teams contributing

National League representative Bob Boone, left, of the Philadelphia Phillies and player representative Phil Garner of the Pittsburgh Pirates arriving at a negotiating session in Washington Wednesday - the 41st day of the major league players' strike.

Boyer took to cycling as a teen-ager in Carmel, Calif., whipping first American citizen to compete in the Tour de France, finishing a through 100-mile daily runs and highly respectable 32d in the tace meeting tutors like Remo d'Agliano, George Farrier and San Hop-kins. He became as good as he could be in California, and knew Born in Utah 25 years ago, raised in California and oow spending winters in Wyoming, Boyer moved to France in 1973 to he had to go to France. Although Boyer's ancestors were

Huguenots who fled religious optry to compete at the top level of pression in the 17th century, he rebicycle racing. His quest was no tained little French identity - ociless audacious than if a 17-year-old ther for language nor hiking. In his family he was lock Boyer, with the Frenchman moved to New York to try to master the intricacies of last name rhyming with lawyer. Yet something must have been in seball and was pitching for the

his genes for cycling. In 1973, Boyer went to ride the

Since taking intensive language lessons, Boyer seems so French The Constant that a Frenchman once bawled himout for driving a German car. Boyer says, "I just pointed at the Wyoming plates and said in Eng-lish, 'I don't understand.'" 500

-Six feet tall and 128 pounds, 1. with close-cropped but wavy hair, Continental-cut wool suit and cool demeanor, Boyer seemed extreme-ly Gallic during a 24-hour pit stop in New York early this week. "I am an American," he said. "I

would like to live and race in the United States in the future. The first step toward that goal

has been taken by the formation of an American group, World Tour Cycling, that says it will sponsor a U.S. team in the 1982 Tour de France, It is quite likely Boyer will be the star of that ensemble.

Boyer is already a prominent rider on the European circuit. The first American to ride in the oearly month-long tour, be wore a red

tainous Auvergne region, living with the family of Patrick Gavaldas, another young rider. Asked if riders had tried to trip him up the way European cyclists did in the movie "Breaking Away" (which Boyer loved), he said: "There was a little of that. A few riders showed resentment and tried to ride you off the road, but I'd yell at them and they wouldn't do it again."

Within a year, Boyer was known as Jacques Boyer (pronounced the French way, "Boy-AY"), and had advanced to the Senior I category. He suffered through overwork and an intestinal virus that threatened his career and eveo his life, but he returned stroogly last year in the Tour de Switzerlandand and won the Red Zinger race in Colorado to earn a spot in the Tour de France.

Although he lives most of the year in Annecy with his wife, Elizdesigner. Bover's ronts remain in the United States. His 6,000-calorie diet (he shuns red meats and

on the course.

Standards have not been completely obliterated, however. When the Royal and Ancieot jovited the press to a cocktail party this year, a Philadelphia reporter disdained the cocktails in favor of a piece of cheesecake. A club lackie rusbed up to him, thundering: You were invited here for drinks only, sir!

#### Cashmere Cash-In

What the British Open did was become what this generation might call a "happening." The commer-cialization began incoceotly enough: A few early-days mer-chants opened a "pitch" alongside the fairways for their sweaters and golf sticks. That has become a tent city of considerable acreage along the first fairway.

The merchanis of England paid a considerable per-square foot fee to display their wares during open week. They cannily offered as pro-fessional discount to the visiting players and other important visi-tors with a view to popularizing their products. But where you could buy a cashmere sweater of highest quality for £6 in 1970, the same cashmere today costs £60. The British Open, like Europe it-

self, today faces a crisis that may threateo its continuing in its present mode. The cost of playing it has always beeo inhibiting. First prize money was always so laughably low that the winner had to

win to break even. Today, at £25,000, the winner can do a lot better. But the ante in this high-level game has gone up even higher. Jack Nicklaus said a week's reot

for Tom Watson this year was in the \$6.000 range. Add to that first-elass air fare from the United States for Tom and wife Linda and Watson is pushing \$10,000 worth of chips out on the table. The 1981 field had the poorest

American turnout in years. Only 17 turned up and only 4 finished in the top 10, a lessoo that will not be lost on the 60 or so who folded their hands and refused to come.

You might put up 10 grand to play with ribbon clerks. But oot if the deck is marked. Most U.S. players regard Briosh Open rough as a game where you're betting into a pat hand. "The Royal and Ancient has to

do something about this situa-tion," said Nicklaus, labeling as "gouging" the escalating costs for the open's overseas players.

"They're making the Quad Cit-ies Open look better and better," said an American, a former open winner. "You don't have any lions in the rough, you can win almost as much money, and you can get to Moline by Greybound if you want

Nicklaus conceded the R&A has tried to control rents in the open venues and bas consulted us innwith British Airways to reduce air fares. For himself, be feels the gamble is justifiable: "If it costs you \$10,000 a year and you win it ooce, it's worth it." Bill Rogers, this user's pioner armset." I does nc 10, this year's winner, agrees. "I don't buy that 'too expensive' stuff. After all, your expenses are deducti-

# **Riot Temperatures**

By Russell Baker

NEW YORK -- For the hig picture oo the recent rioting in England, the man to see is Professor Harold Liverworth, the world's foremost rioting expert. The professor has rioted on six cootinents, heen tear-gassed, clubbed and cut by broken glass more times than he can remember, and been arrested

for looting in 13 countries, all in the cause of academie research. Unfortunately.

he was unable in reach England before the noting there subsided. Liverworth contends that

Baker rioting is as old

as civilization. "In fact," he said, "people wanted to riot long before civilization, but there was no way they could do it. Imagine yourself plunked down in a society where everyone is wandering around from cave to cave clubbing everyone else with stones and tree trunks. Not much a portunity for ricting in that kind of set-up, is there?"

What was needed to make noting possible for these primitive folk? "It seems clear," said the professor, "that a bunch of idle young men one wath stands night, being too exhausted by the heat to club each other, must have realized how satisfying it would be young men one warm summer to have windows to smash, shops to loot and automobiles to overturn. What was needed were things that could be clubbed and yet would not club back. In short, they required civilization in order to satisfy the riotous impulse."

Sooo civilizatioo was created, hut it was not very satisfying for early rioters. For one thing, most of the buildings were solid stone. After a few attempts to smash in pyramids, rioters became discouraged. Those who overturned and burned chariots, moreover, were flogged, flayed or hanged, which was equally discouraging. Why such brutal treatment?

\* \* \*

"In those days," the professor said, "the authorities did oot know that the proper thing to do after a riot is to appoint a committee to investigate the causes of the riot-

ing." "So ancient man had oo idea at

root causes animating the fury and frustration of their rioters? "Nonsense," said the professor.

"the causes of noting have always been obvious. They are only two: good weather and youthful ener-Surely you oversimplify, Dr.

Liverworth "Oh yeah? When is the last time you read of a riot in retirement village or a nursing home? How many riots take place in January?"

\* \* \* It may be that different people become not-prone at different temperature humility levels, Liverworth believes. These may vary widely. Thus, a 15-year-old who is seized by the urge to riot at 82 degrees and 70 percent humidity may lose the impulse entirely at

81 degrees and 72 percent humidity, whereas another youth of the same age might be primed for rioting on a 65-degree evening of very low humidity, but only when the wind is from the north.

Liverworth would like to see ooc of our many riot-study commissions investigate the weather factor, in the has that eventually science could discover every youth s individual meteorological riot point and require him to report to 3 gym for strenuous exercise when his personal temperature-humidity-wind index points to danger.

\* \* \* He noted the varying political explanations of the English rioting: British Socialists say it proves Prime Minister Thatcher's Tory economic policy is disastrous; British Conservatives say it proves the rules of civilization are endan-gered; U.S. liberals say it is a warning of the danger inherent in Reagan economics; U.S. conservatives say it shows how a society will rot when low-income folks are encouraged to think they have a

SO CO. "The inevitable committee." said the professor, "will come in with the inevitable report includ-ing the inevitable political straddle and the inevitable finding that potentially explosive changes are un-der way, which will be true since they always are, whether anybody is noting or ooL Inevitably, it will ignore the ancient facts of rioting."

right to government bandouts, and

Namely? Young men and good weather will always do the trick, and al-ways have. Ask the Babylonians."

#### Despite Courtroom Clash, Jane Isn't What She Used to Be

By Peter J. Boyer Los Angeles Times Service

HOLLYWOOD - MGM's new "Tarzan the Apernan" will open in theaters across the United States today, and it arrives carrying certain unusual distinctions: The film has played in two federal courts (U.S. District Court in New York and the 2d U.S. Circuit Court of Appeals); it has been edited by a judge: it has been panned by its director "It stinks") and by the interests that tried to block its release ("laden with voyeurism"); and for the first time since James Pierce played the ape-man, Tarzan doesn't utter a single line of dialogue.

When Pierce played the lead role in "Tarzan and the Golden Lion," nobody else had any dialogue, either. That 1927 film, 40 or so Tarzans" ago, was a silent movie.

That this new "Tarzan" would open at all was not decided until late last week, when the appeals court denied an injunction that would have prevented the film's release.

MGM seems to be the only party involved in the "Tarzan" matter that is happy with the court's ruling, and understandably so. The studio bas fashioned a \$2.5-millioo promotion campaign around the release. A spokesman for the estate of "Tarzan" creator Edgar Rice Burroughs, which had sought the in-junction, assailed the court's ruling as "ridic-ulous." The new "Tarzan" remake "muulated" Burroughs' story, the estate claims.

And John Derek, who directed the film and whose wife, Bo, portrays Jane, com-plained that the movie that MGM plans to

Weissmuller, O'Sullivan, 1932.

release is not the movie created by him and his wife, who also produced. "The end of our picture as it oow stands - it stinks."

Which raises another of the film's distinc tions: It was edited with the "help" of U.S. District Court Judge Henry Werker.

#### 1931 Agreement

The Dereks' movie landed in Werker's New York courtroom after a long battle by the Burroughs estate to stop the film. The estate maintained that the approach that the Dereks employed was not within the 1931 licensing agreement that gave MGM the right to remake "Tarzan the Apeman."

The estate insisted MGM had to make a film along the lines of the first MGM "Tarzan," which was a nice, straightforward jungle adventure in which Johnny Weissmuller and Maureen O'Sullivan remained steadfastly clothed (loinclothed, anyway) throughout.

As the Dereks' versioo featured a good deal of Bo Derek nudity and focused on the characters of Jane and her adventurer father (played by Richard Harris), the new "Tarzan" was a breach of the 1931 licensing agreement, the estate maintained.

Werker watched the new movie, along with the Weissmuller "Tarzan" and a 1959 MGM remake. He ordered cuts. Cuts were made. He ordered more cuts - this time, sources said, offering specific suggestions. Over the strenuous objections of John Derek (who had oo contractual right to intervene), MGM made more cuis

The second round of editing satisfied Werker, and on July 13 he ruled in MGM's favor. The Burroughs estate appealed.

#### Expedited Appeal

The three-judge panel constituting the 2d U.S. Circuit Court of Appeals granted the Burroughs estate's motioo for an expedited appeal, which means the court will hear the ppeal during the week of Aug. 31. However, the court refused to grant the estate's motion for an injunction pending appeal. That would have mean 1 MGM could oot go ahead with its plans to release "Tarzan."

Now all the Burroughs estate can really hope for is to be awarded damages, probably a sum of money and part of the film's take. The estate is oot satisfied with that.

"It's ridiculous to say that the kind of injury that has been inflicted can be decided monetarily," said a Burroughs spokesman. "You mutilate a property, it's mutilated. Mooey doesn't paste it back together."

However, another source said the estate would be most willing to exact "a pile of money in punitive damages" from MGM.

Meanwhile, Joho Derek burns. He is angry at the Burroughs estate, at MGM and at "the

### press, which is worrying about this trivial lit-tle thing while the world is falling apart."

Derek, who was informed of MGM's cuts in his picture by a reporter, said he was "still trying to hear from the horse's mouth" what happened. "[Frank] Rosenfelt, who's chairman of the board [at MGM], saw it and says he can't see the difference," Derek said. "I think that's sad. And I think the audience will be able to tell. The nudity that was cut out was organic oudity."

MGM would only say that three minutes and six seconds of the film had been edited, "so the film complies with Judge Werker's

interpretation of the 1931 agreement." However, Derek said that MGM made cuts in addition to those ordered by Werker, cuts that bad nothing to do with Bo Derek's nudity, hut with Richard Harris' role. "It doesn't make sense." said Derek, "It's

all very silly, an endless bunch of bull."

Bourne Hogarth comic strip, 1936.

A researcher who was aboard the years old." He now is 76. The one of the largest the museum received in its 111 years, with vessel that scanned the ocean floor for the Titanie says the sunken luxtoward creation and endowing the Ruth and Harold D. Uris ury liner's location remains a mystery and the expedition came up ter for Education. The center empty-handed. "Wc didn't discovmoney will be used to broaden er a whole ship sitting on the botton." Mark Oisson said after the 174-foot research vessel Gyre ar-rived in Boston. "We found tantalizing clues. We now know where it's not." The Gyre spent about nine days in the North Atlantic searching for the Titanic, which struck an iceberg on its maiden voyage in 1912 and plunged to the botton in about 12,000 feet (3.640 meters) of water, killing more than 1,500 people. The liner was reportedly carrying up to \$300 million in diamonds and other valuables. Researchers said that the next step in the search - which began with an least a month. The Gyre searched 60 square miles of ocean floor, including a massive canyon into which the ship may have fallen. If

the Titanic's last reported position was in error, another expedition prohably would have to cover hun-dreds of additional miles. The sci-

entists and adventurers who were

aboard the Gyre displayed a varie-

ty of photographs purporting to show some small man made ob-

jects on the ocean floor, but no one

could say whether they were from the Titanic. The search was led by Michael Harris, head of the Tam-

pa. Fla-based International Expe-ditions, and was financed by Jack Grimm, a Texas oilman.

Prince Charles' stag party for 20

of his friends was supposed to be a

secret. But when the prince arrived at White's, an exclusive club in

central London, he was met by reporters and photographers. "I was obviously angry that it leaked out," said William West, secretary of the all-male club. The party was

described by The Times of London

as "the most closely guarded se-cret" surrounding the July 29 wed-ding of Charles and Lady Diana Spencer. The Times said White's

staff did not even know who the

party was for until the prince ar-

rived. A Buckingham Palace spokesman said before the event that he was "not aware" of any
